

# Start Faster, Go Further with IoT

Designed for industrial equipment manufacturers, Bright Wolf's customizable reference system and enterprise API provides the fastest path to secure and flexible edge solutions using Azure IoT and Intel solutions.

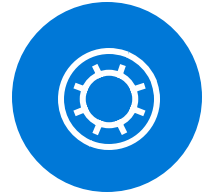

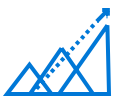

Integrate disparate machines, sensors and gateways

Collect data for AI and machine learning

Optimize outcomes

Use pre-built components to solve the complexity of IoT so you can focus on business outcomes and growth.

Get data for driving effective AI and machine learning for predictive maintenance.

Easily integrate new tools, apps and machines as your business evolves over time.

Take advantage of Microsoft Azure IoT, a global, trusted and intelligent public cloud platform that safeguards your investments and protects your data.

## Rapid delivery

“ We chose Bright Wolf for their experience at the industrial edge and commitment to rapid delivery. They were able to quickly understand both our business and technical needs, and helped us build a flexible connected product solution, based on Microsoft Azure, and designed to give us a strong competitive advantage going forward.”

— **Daric Schweikart**

Vice President,  
Shape Technologies Group
