

# Improve Equipment Health to Optimize Operations

Insight Smart Industrial Operations is a customizable solution accelerator that helps you analyze equipment health, efficiency, and productivity. Machine learning on Microsoft Azure delivers powerful insights, while Intel edge computing brings them to your entire business.

### Real-time visibility

Capture rich data and analyze it in real time with powerful machine learning capabilities. Easily visualize data on custom Power BI dashboards.

### Edge ready

Accurately monitor equipment in even the most geographically distant locations with the ability to collect and process data in the cloud or on the edge.

### Autonomous innovation

Insight partners with Microsoft Bonsai Project for Autonomous Systems, enabling next-generation operational optimization.

### Reduced downtime

Predict equipment maintenance needs and failures before you incur costs and downtime.

### Easy deployment

Get up and running quickly and cost-effectively. Connect to SAP and other industry solutions with prepackaged integrations.

### Detailed analytics

Sensors on equipment record real-time data. Then, business logic microservices calculate key metrics on performance, quality, and more.
