

IoT in Action

#IoTinActionMS

Unlocking IoT's Potential

Tony Shakib

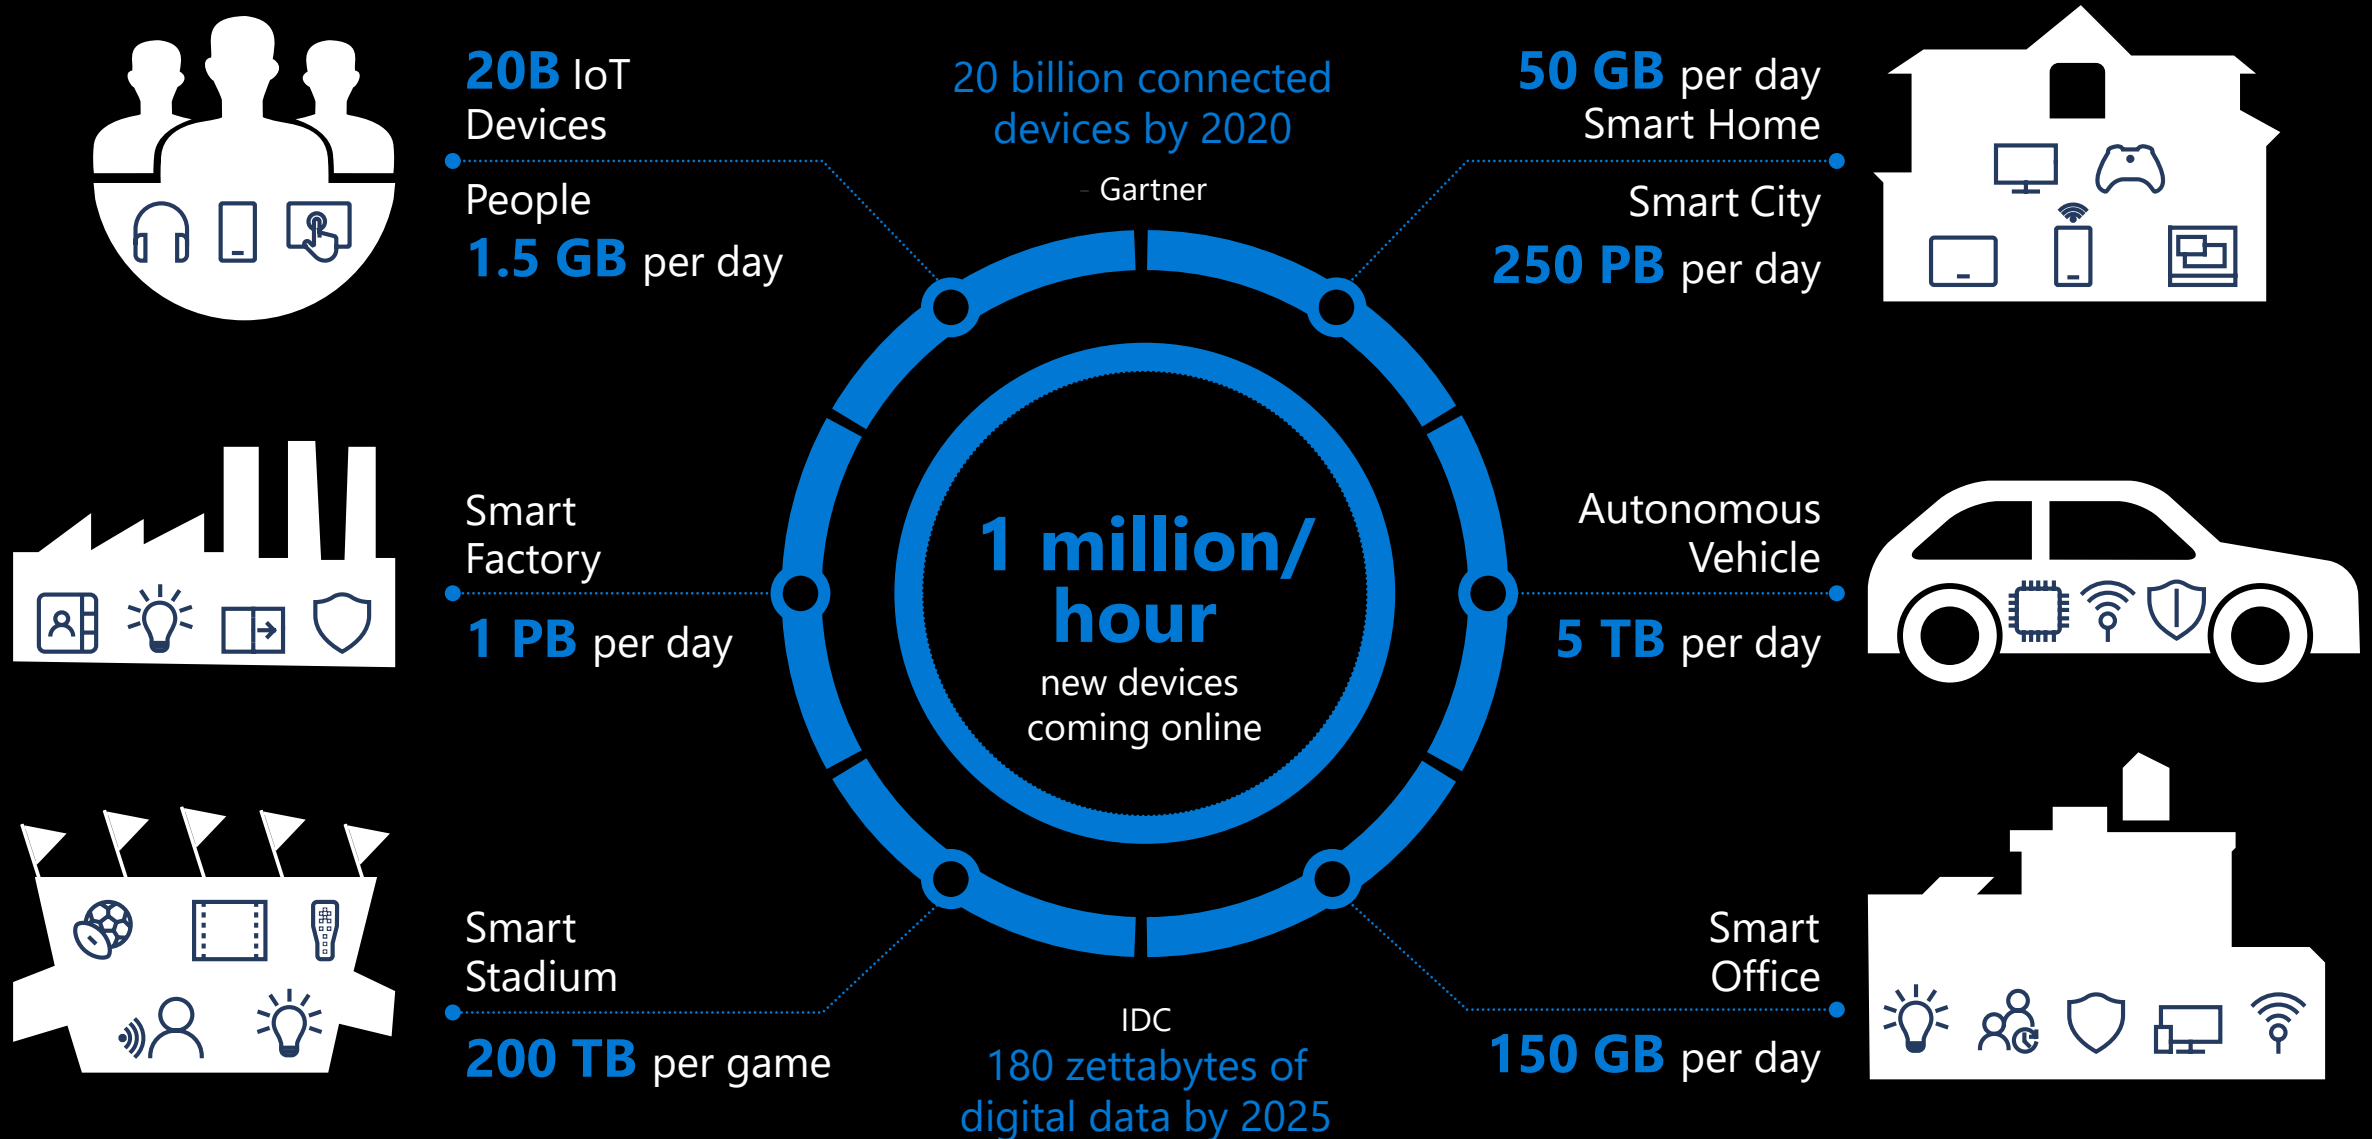

General Manager

Azure IoT

Microsoft

IoT in Action

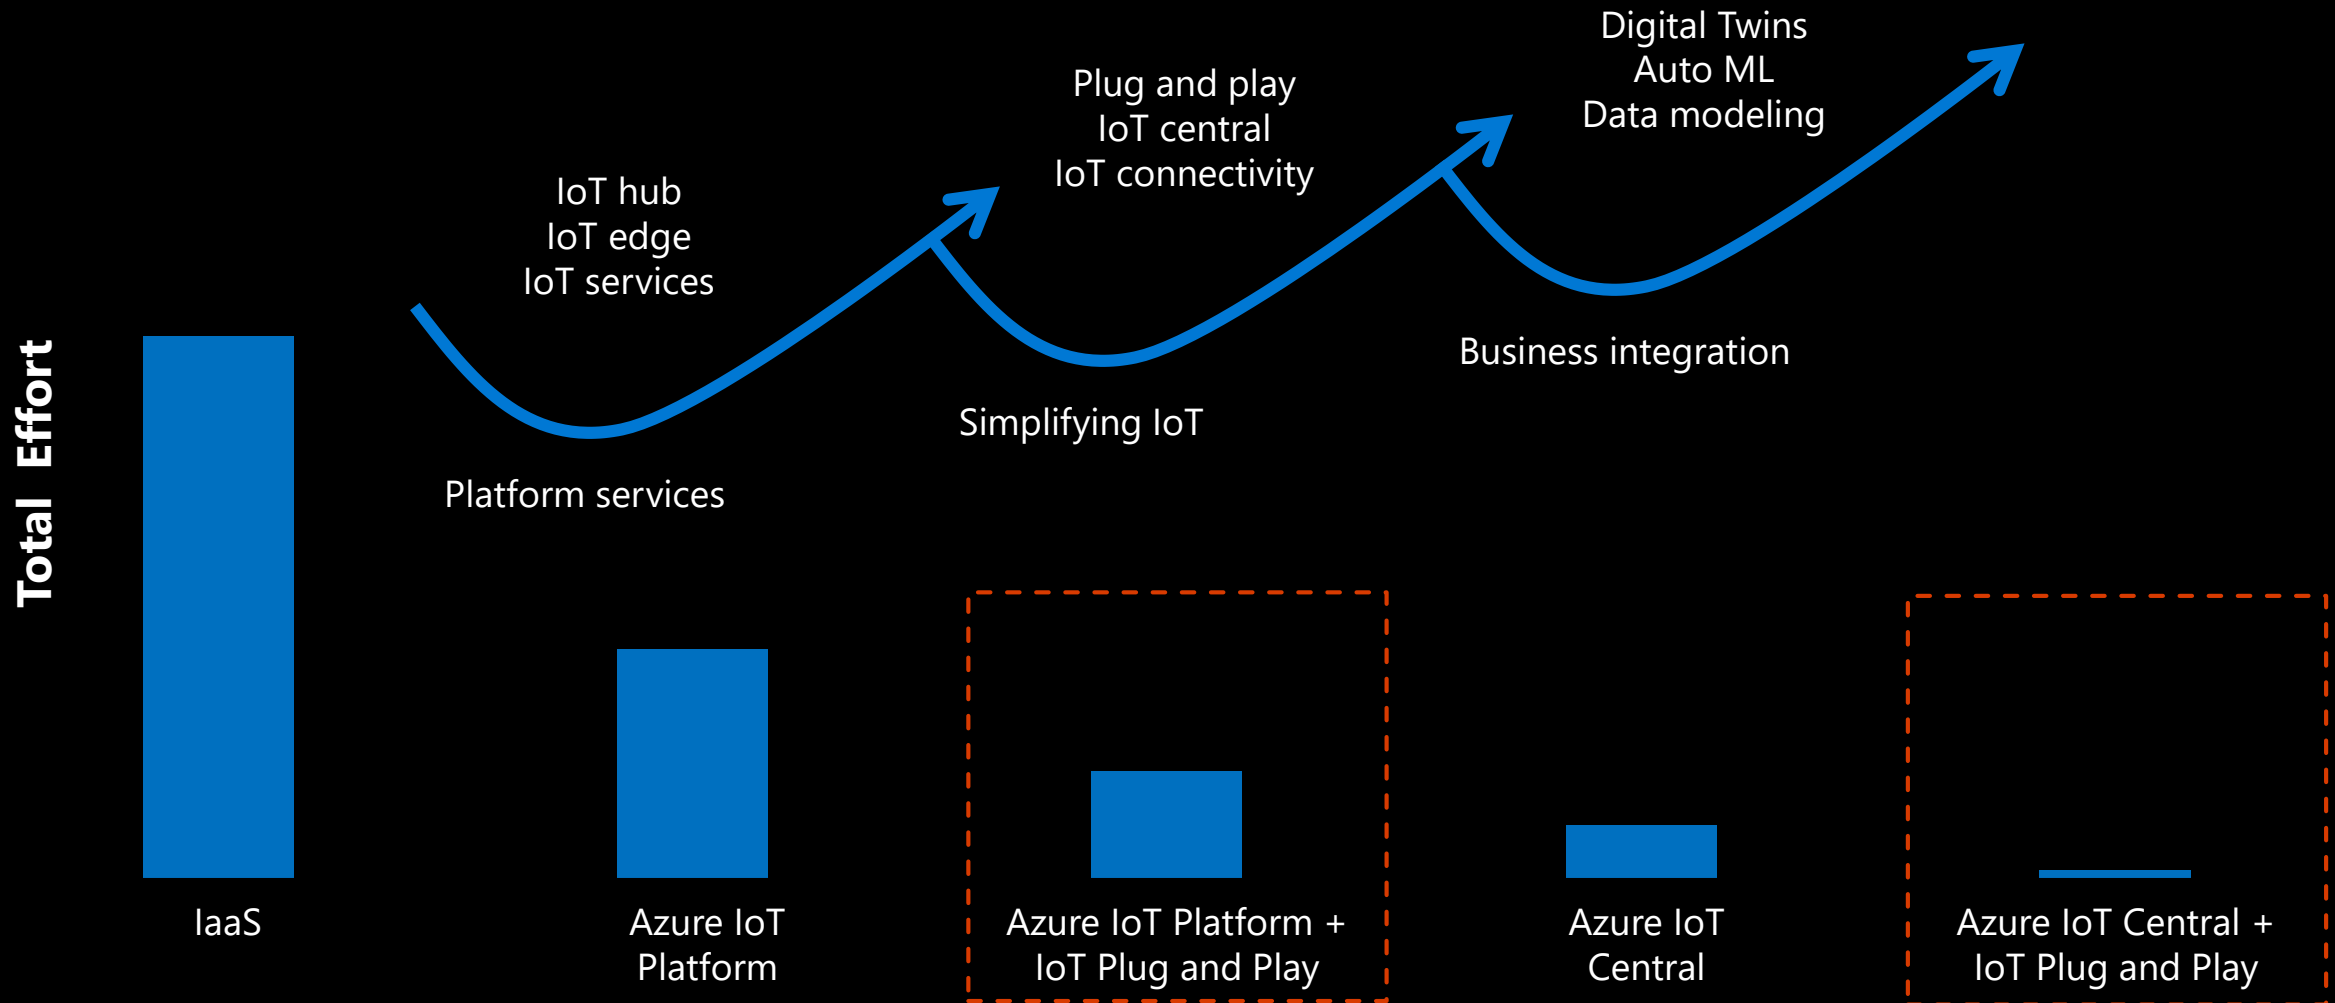

IoT fuels digital transformation

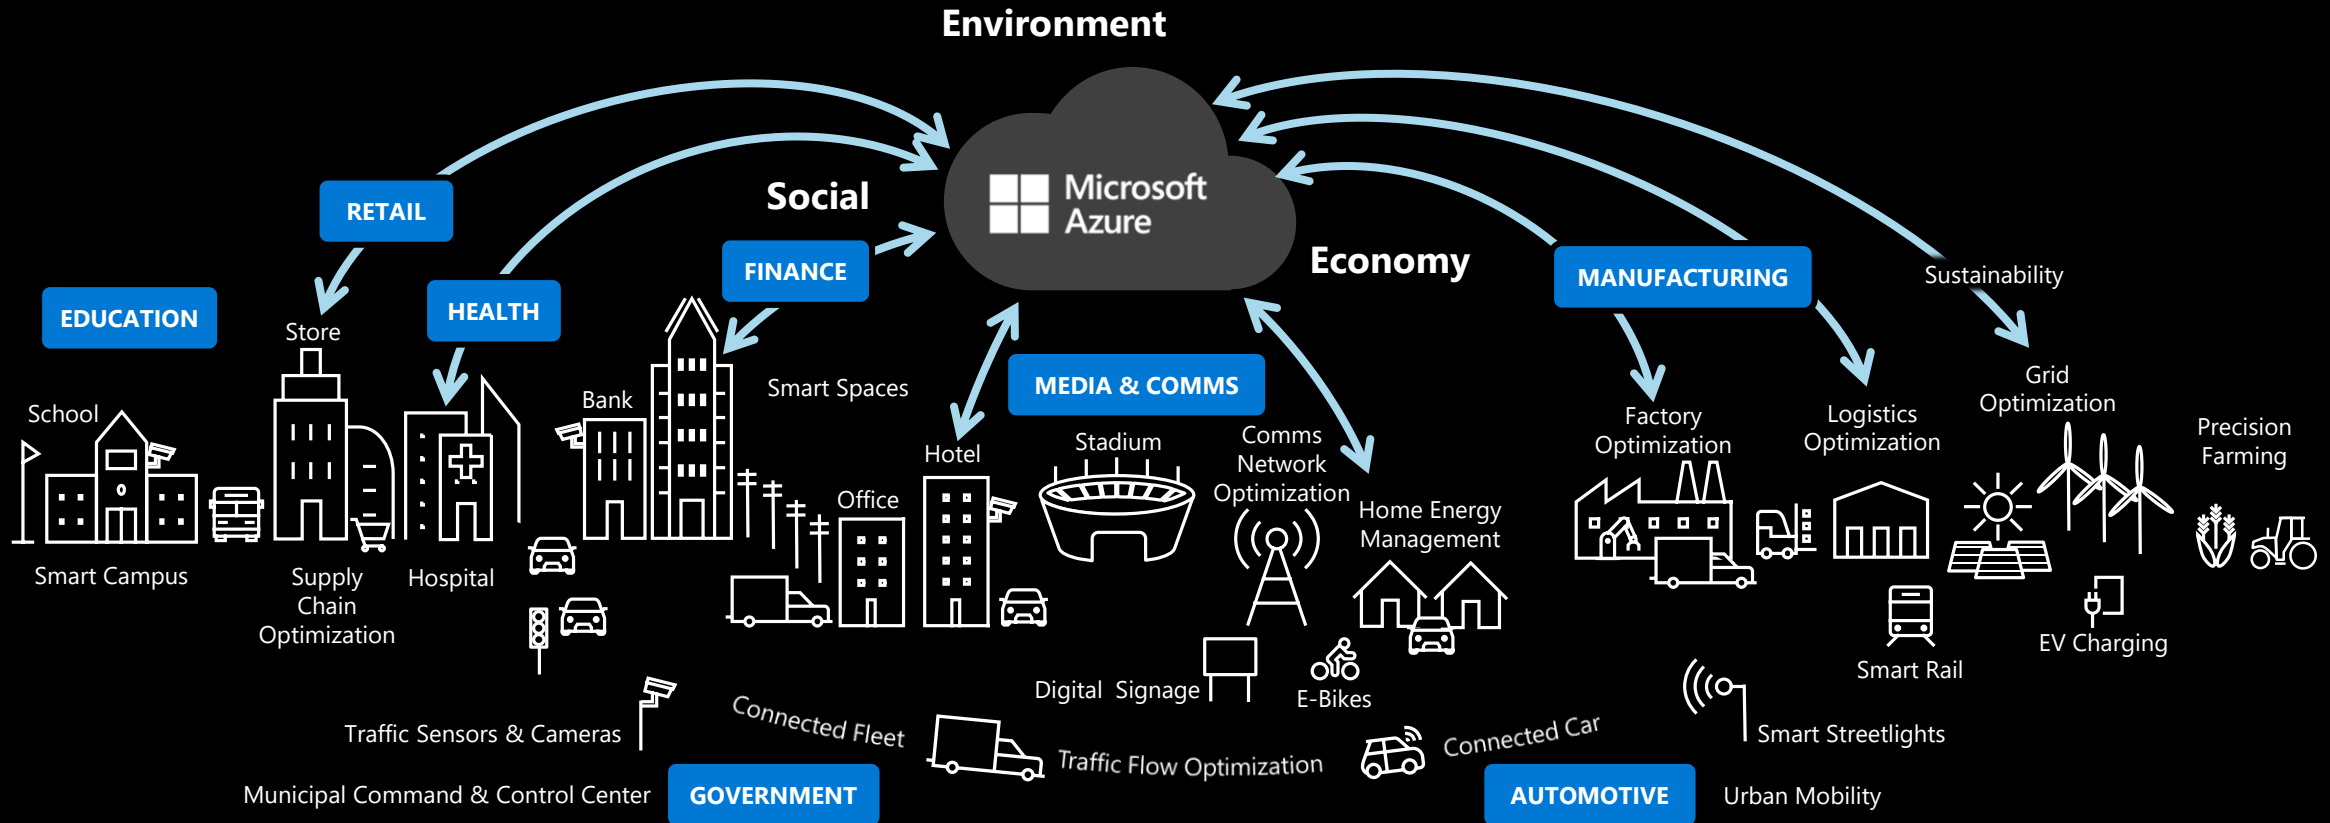

How can we make blind people's lives easier? If it's disabled
How can we make it easier for people to see things
from sensor values?

Accelerating IoT adoption

The total effort to build and operate an IoT Solution is rapidly decreasing

Microsoft invests \$5 billion in IoT

Our goal is to give every customer the ability to transform their businesses, and the world at large, with connected solutions

Industrial IoT leadership

SIEMENS

Leonardo runs with Azure IoT

Armstrong runs with Azure IoT

Microsoft's comprehensive IoT portfolio

Azure Security Center for IoT

Azure IoT priority verticals	 Manufacturing	 Retail	 Agriculture	 Energy	 Smart Cities	 Healthcare	 Transportation
Azure IoT Solutions	 Azure IoT Central (SaaS)	 Azure IoT Reference Architecture & Accelerators (PaaS)	 Dynamics Connected Field Service (SaaS)				
Azure Services for IoT		Azure IoT Hub Azure IoT Hub Device Provisioning Service Azure Digital Twins Azure Time Series Insights Azure Maps	Azure Stream Analytics Azure Cosmos DB Azure AI Azure Cognitive Services Azure ML Azure Logic Apps	Azure Active Directory Azure Monitor Azure DevOps Power BI Azure Data Share Azure Spatial Anchors			
IoT & Edge Device Support		Azure Sphere Azure IoT Device SDK Azure IoT Edge Data Box Edge	Windows IoT Azure Certified for IoT—Device Catalog Azure Stream Analytics Azure Storage	Azure ML Azure SQL Azure Functions Azure Cognitive Services			

Intelligent cloud

IoT Hub – Most Mature, Scalable, Secure Cloud Platform

Azure IoT Hub

Bi-directional communication

- Millions of devices
- Multi-language, open source SDKs
- HTTPS/AMQPS/MQTTs
- Send telemetry
- Receive commands
- Device management
 - Device Twins
 - Queries & jobs

Enterprise scale and integration

- Billions of messages
- Scale up and down
- Declarative message routes
- File upload
- WebSockets and multiplexing
- Azure monitor
- Azure Resource Health
- Configuration management

End-to-end security

- Per device certificates
- Per device enable/disable
- TLS security
- X.509 support
- IP whitelisting/blacklisting
- Shared access policies
- Firmware/Software updates
- Azure Security Center Support

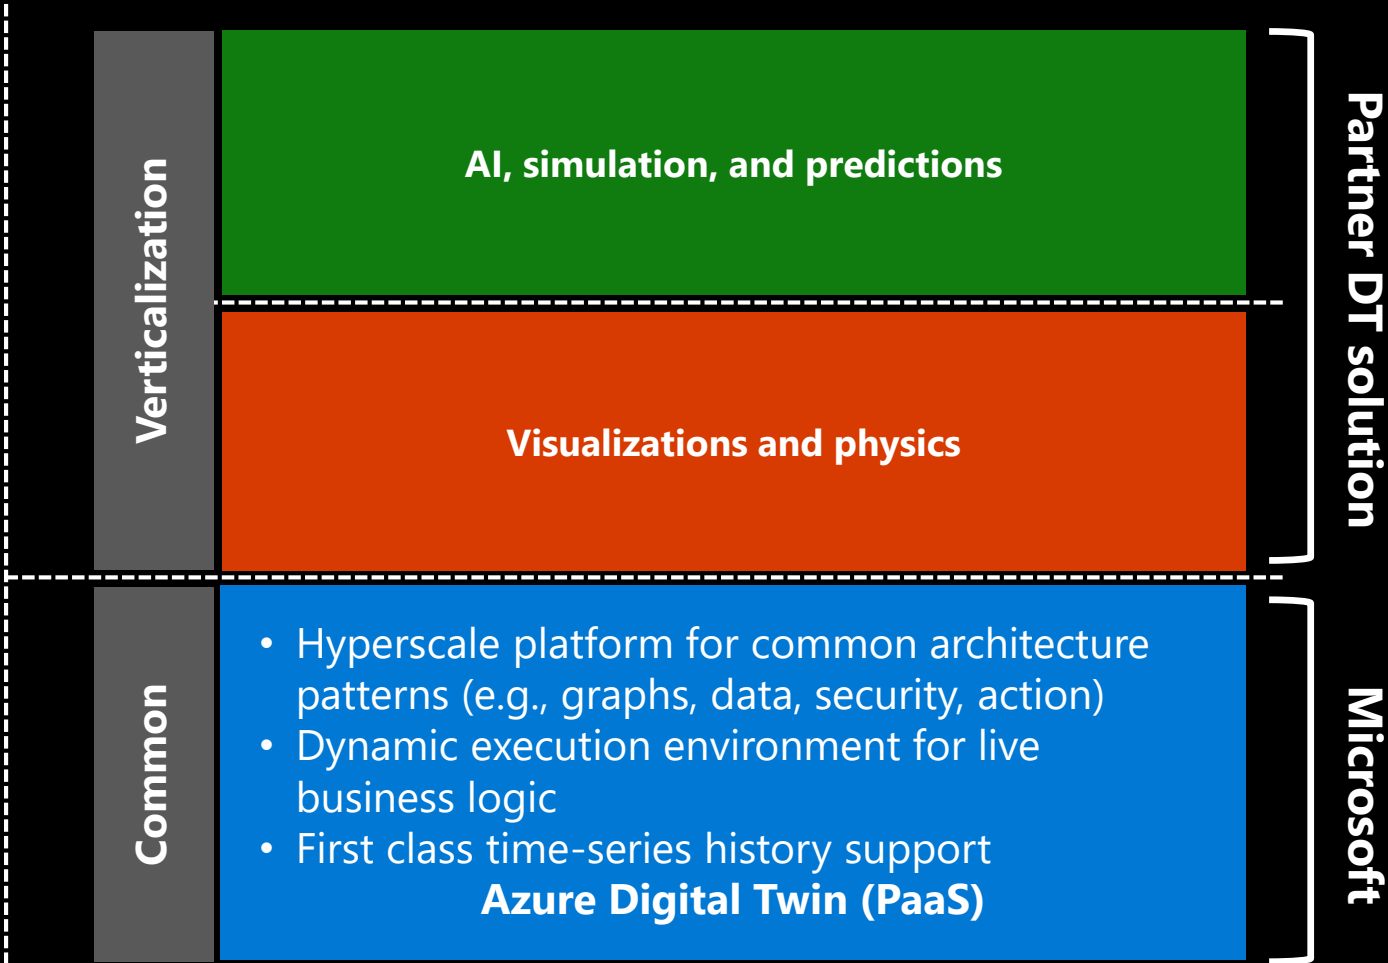

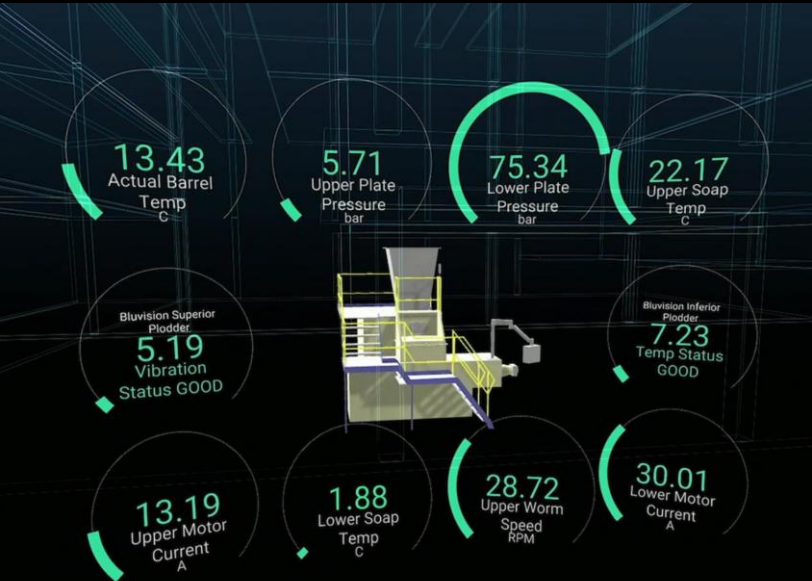

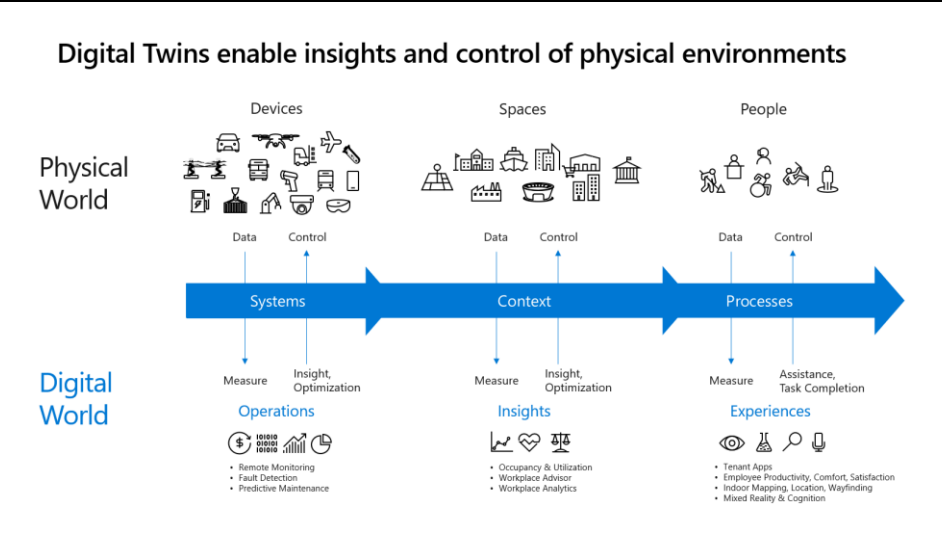

Device Provisioning Service

IoT-scale automated provisioning

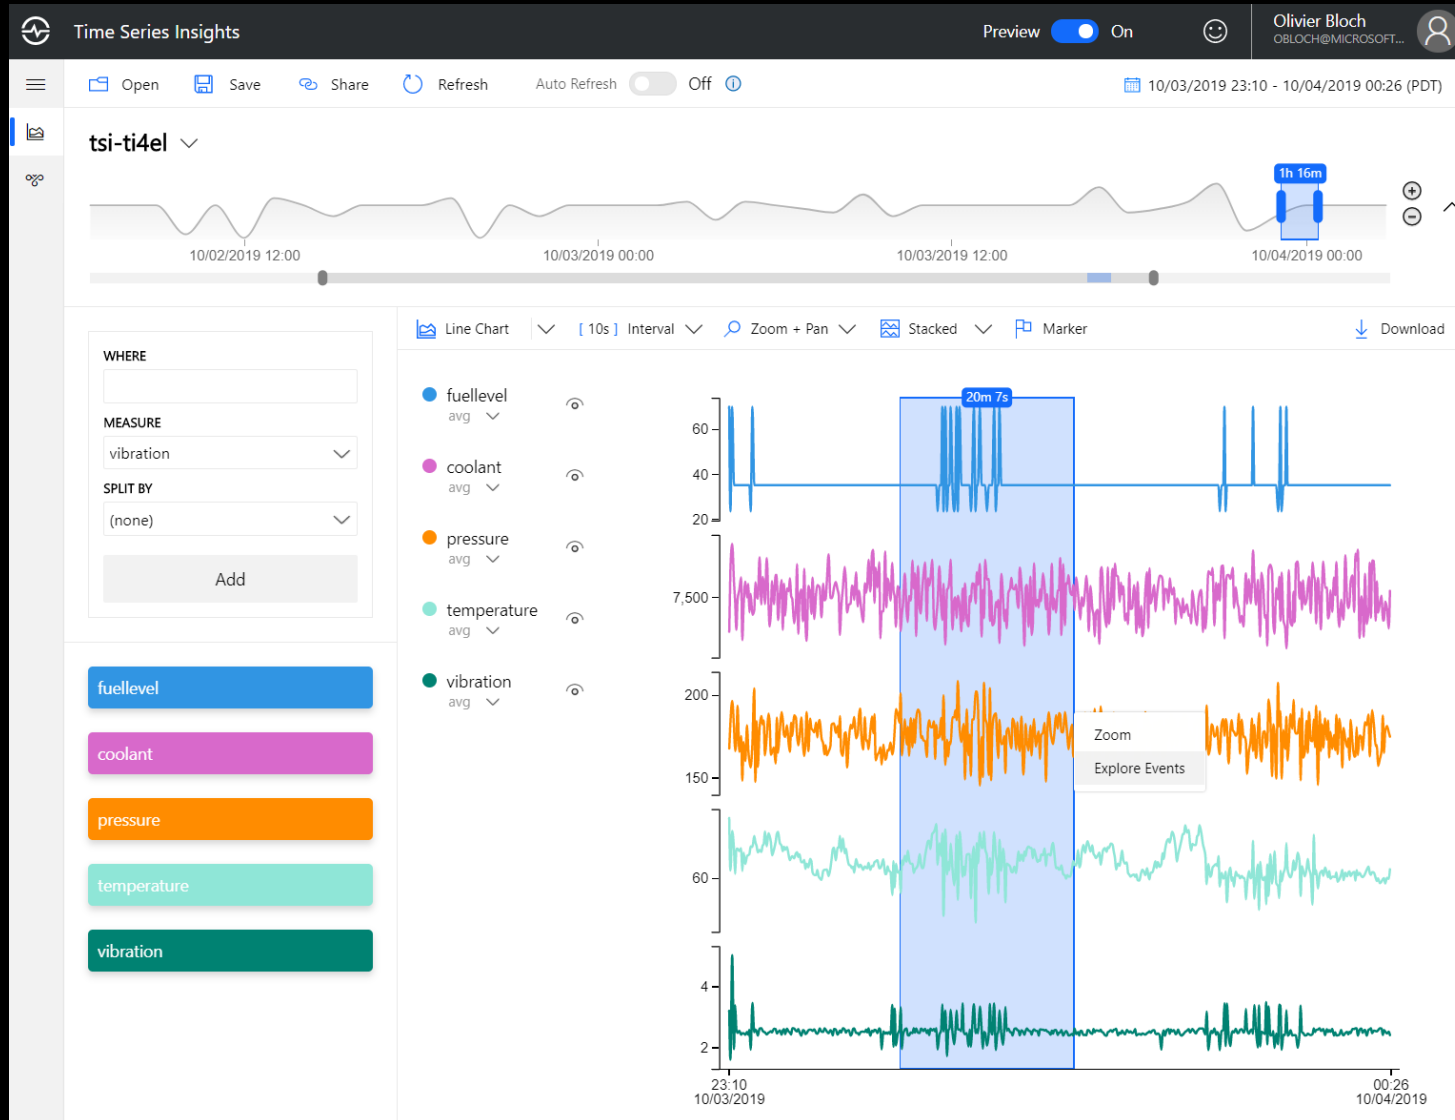

- Zero-touch provisioning
- Centralize your provisioning workflow
- Load balance across multiple IoT Hubs
- Re-provisioning support
- Supports TPM + X.509

Digital Twins

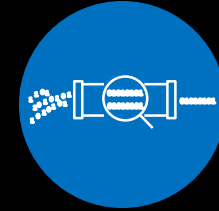

Modular Azure architecture for better scale

Time Series Insights

Industrial IoT data characteristics

IoT data **lacks** structural consistency

IoT data **needs** contextualization

IoT data is **used with** other data from first or third party sources

IoT data is **characterized** by infinite retention

Azure Maps

A platform of geospatial APIs for the enterprise

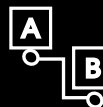

Maps

Render maps and satellite imagery across many geographies

Map control

Integrate rich mapping visualizations into applications

Routing

Calculate routes from N to N points

Search and geocoding

Convert places and addresses to coordinates

Traffic

Show real time traffic information

Time zones

Obtain time zone and current time information

Geolocation

Obtain IP-based location information

Spatial operations

Perform common geospatial operations, including geofencing, buffers, and closest point functions

Mobility (transit)

Access real-time intelligence for transit stops and routes

Bringing Plug and Play to IoT

Benefits

DEVELOPERS

Dramatically reduces the effort needed to build software on devices

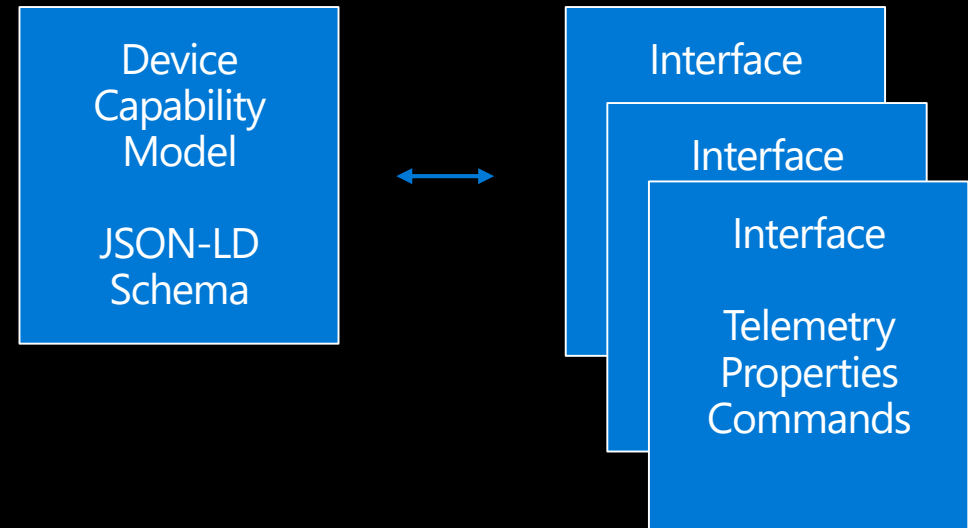

CUSTOMERS & PARTNERS

Large ecosystem of devices that just work with Azure IoT solutions, without any development required

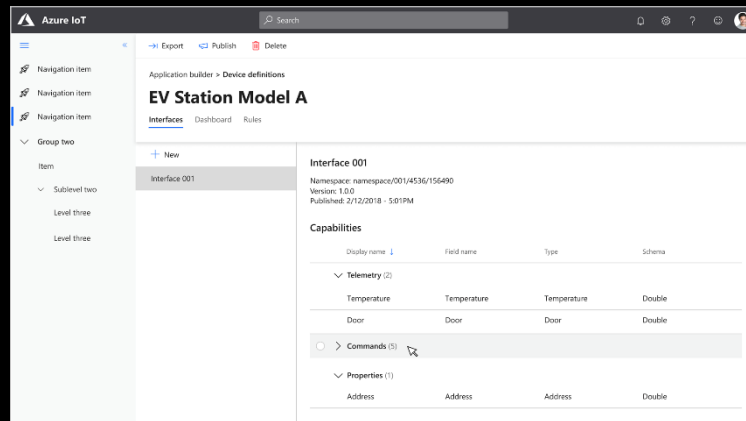

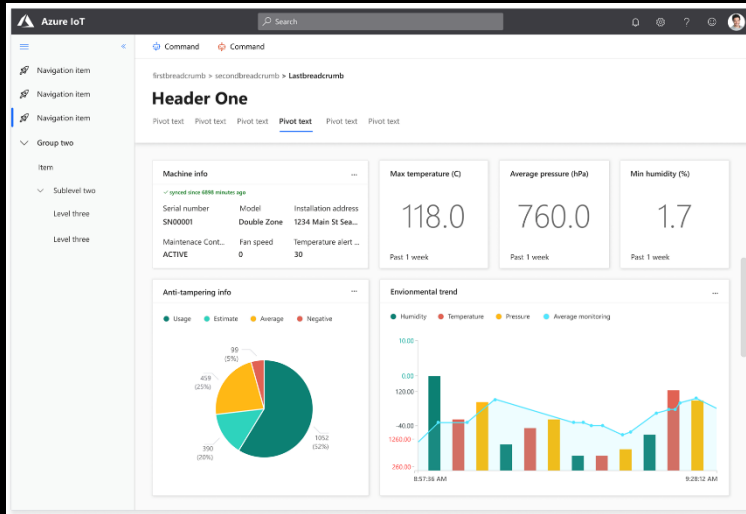

DEVICE PROVIDERS

Certify your device for IoT Plug and Play and it can be used with any Azure IoT solutions

Open source and using open standards

IoT Central

Device connectivity and management

Telemetry ingestion and command and control

Monitoring rules and triggered actions

User roles and permissions

Dashboards, visualization, and insights

Fully hosted and managed by Microsoft

White labeling

Plug and Play

Extensibility and customization

Location telemetry and geofence

Industry solution templates (coming soon)

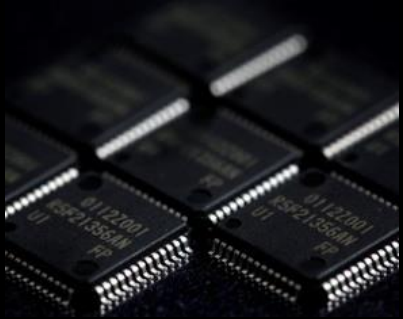

Edge support (coming soon)

Intelligent Edge

Intelligent Edge

The most comprehensive IoT and Edge offerings in the market

Devices + Sensors

IoT devices

Azure IoT Device SDK

Endpoint devices such as appliances, vehicles, or factory machines that connect, interact, and exchange data

1,300+ devices, 300+ partners—all certified to work great with Azure IoT Services

Cross-platform and open source: Windows IoT, Linux, RTOSs, ThreadX and more

Device security

Azure Sphere

Integrated hardware, software, and cloud services work seamlessly together to deliver security by default

Deployment options to securely connect existing equipment and build security into new edge devices

Over 10 Years of security and OS updates delivered directly to each device by Microsoft

Sensors to interactive

Edge devices

Azure IoT Edge

Devices that aggregate, process, and provide gateway capabilities for IoT endpoints

Deploy and manage Azure Services in containers on any IoT device

AI, Azure ML, Azure Stream Analytics, and more

Cross-platform and open source: Windows IoT, Linux

Integrated platform

Edge appliances

Azure Data Box Edge

Integrated appliances that provide a subset of cloud edge roles, such as ML-inferencing

Data Box Edge: AI-enabled, storage, and compute Azure Edge appliance

Data Box: Offline, ruggedized data transport, 100 TB–1 PB

On-premises platform

Azure Stack

Scalable solutions that provide a full cloud stack, including IaaS and PaaS capabilities

Edge and disconnected scenarios

Regulatory requirements

Cloud app model on-premises

Global scale processing

Hyperscale cloud

Edge Regions

First-party cloud regions

Full range hyperscale cloud services

Tiered service availability: Heroes > Hubs > Satellites

Open source-based services and tools

Most specialization

Fewest services

Full spectrum of Cloud + Edge form factors

Intentional and appropriate Azure service availability

Fewest form factors

Most services

IoT attacks put businesses at risk

Devices bricked or held for ransom

Devices are used for malicious purposes

Data and IP theft

Data polluted and compromised

Devices used to attack networks

The cost of IoT attacks

Stolen IP and other highly valuable data

Compromised regulatory status or certifications

Brand impact (loss of trust)

Recovery costs

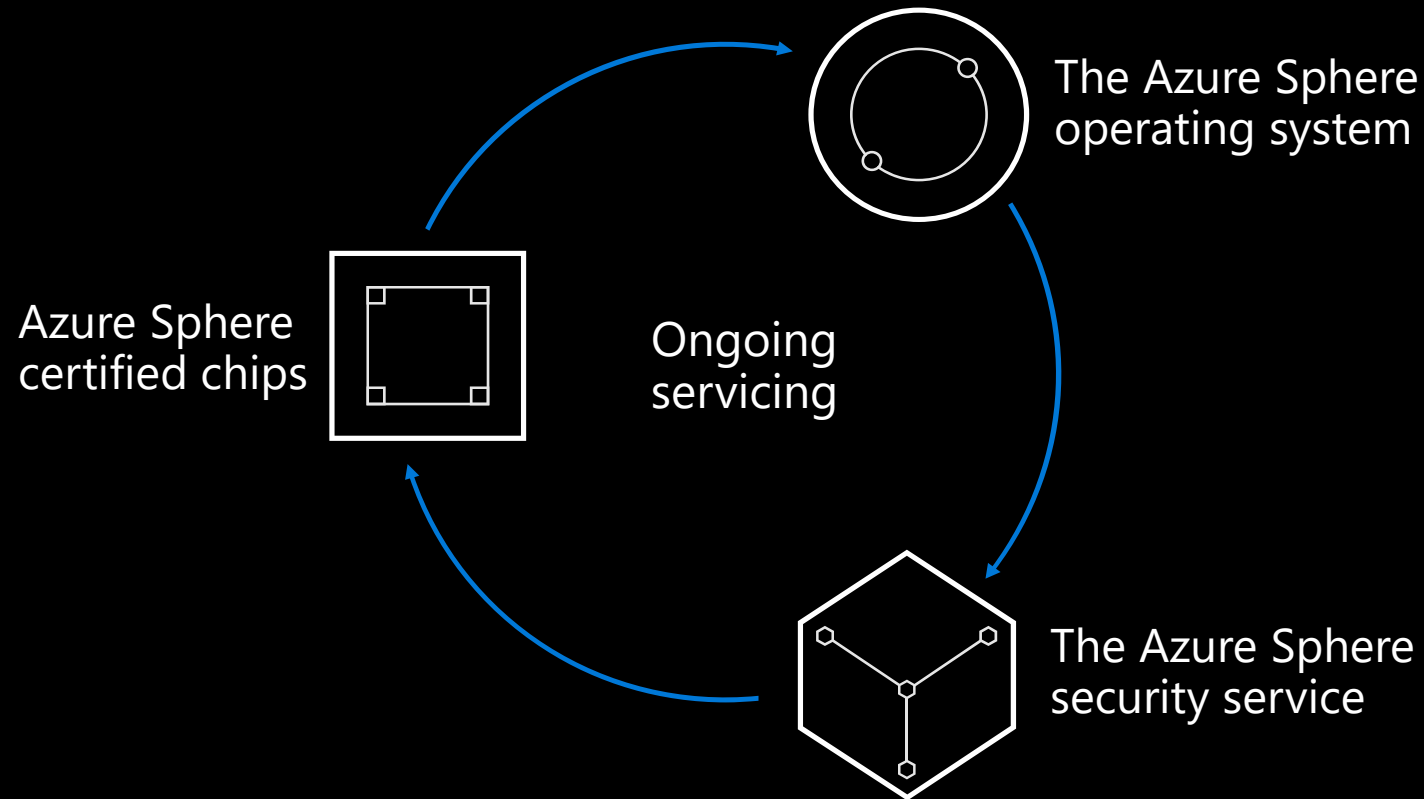

Financial and legal responsibility

Downtime

Security forensics

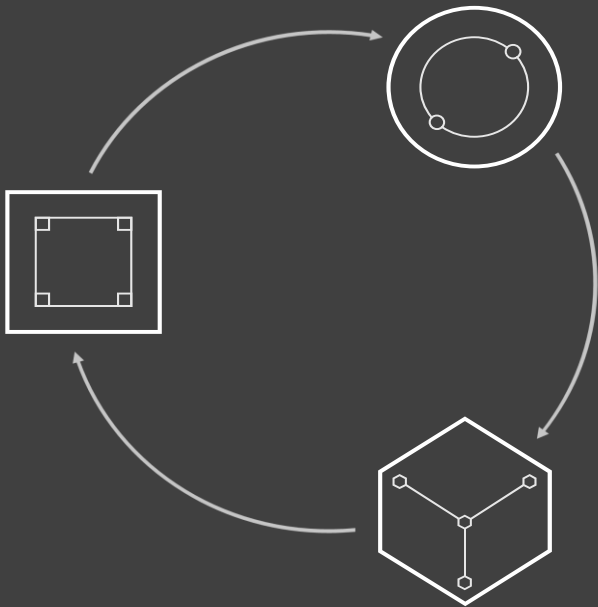

Azure Sphere

An end-to-end solution for securely connecting existing equipment and to create new IoT devices with built-in security. Ongoing updates from Microsoft keep your devices secured over time as threats evolve.

Over 10 years of security and OS updates delivered directly to each device by Microsoft

Protect your data, privacy,
physical safety and infrastructure
with Azure Sphere.

Integrated hardware, software, and cloud services work seamlessly together and deliver active security by default.

Defense in depth provides multiple layers of protection to help guard devices against and respond to threats.

Ongoing security and OS updates from Microsoft keep your devices secured over time.

Implementation options allow you to secure existing equipment and build security into new IoT devices.

Simplified business model with one-time upfront price includes hardware, security service, and full OS update servicing for over a decade.

Intelligent edge devices require a new approach

Time

Many IoT solutions
require months
to set up

Security & trust

IoT poses unique
security, privacy
and, compliance
challenges

Modernization

Newer technologies
like ML/AI require
new skill sets

Windows IoT family—fast, safe, smart

Windows 10 IoT Core

For small-footprint, smart devices

Enabling lower cost devices

Windows 10 IoT Enterprise

For fixed-function, smart devices

Locked down, full edition of Windows 10

Windows Server IoT 2019

Advanced data analysis and storage

Enhanced security capabilities

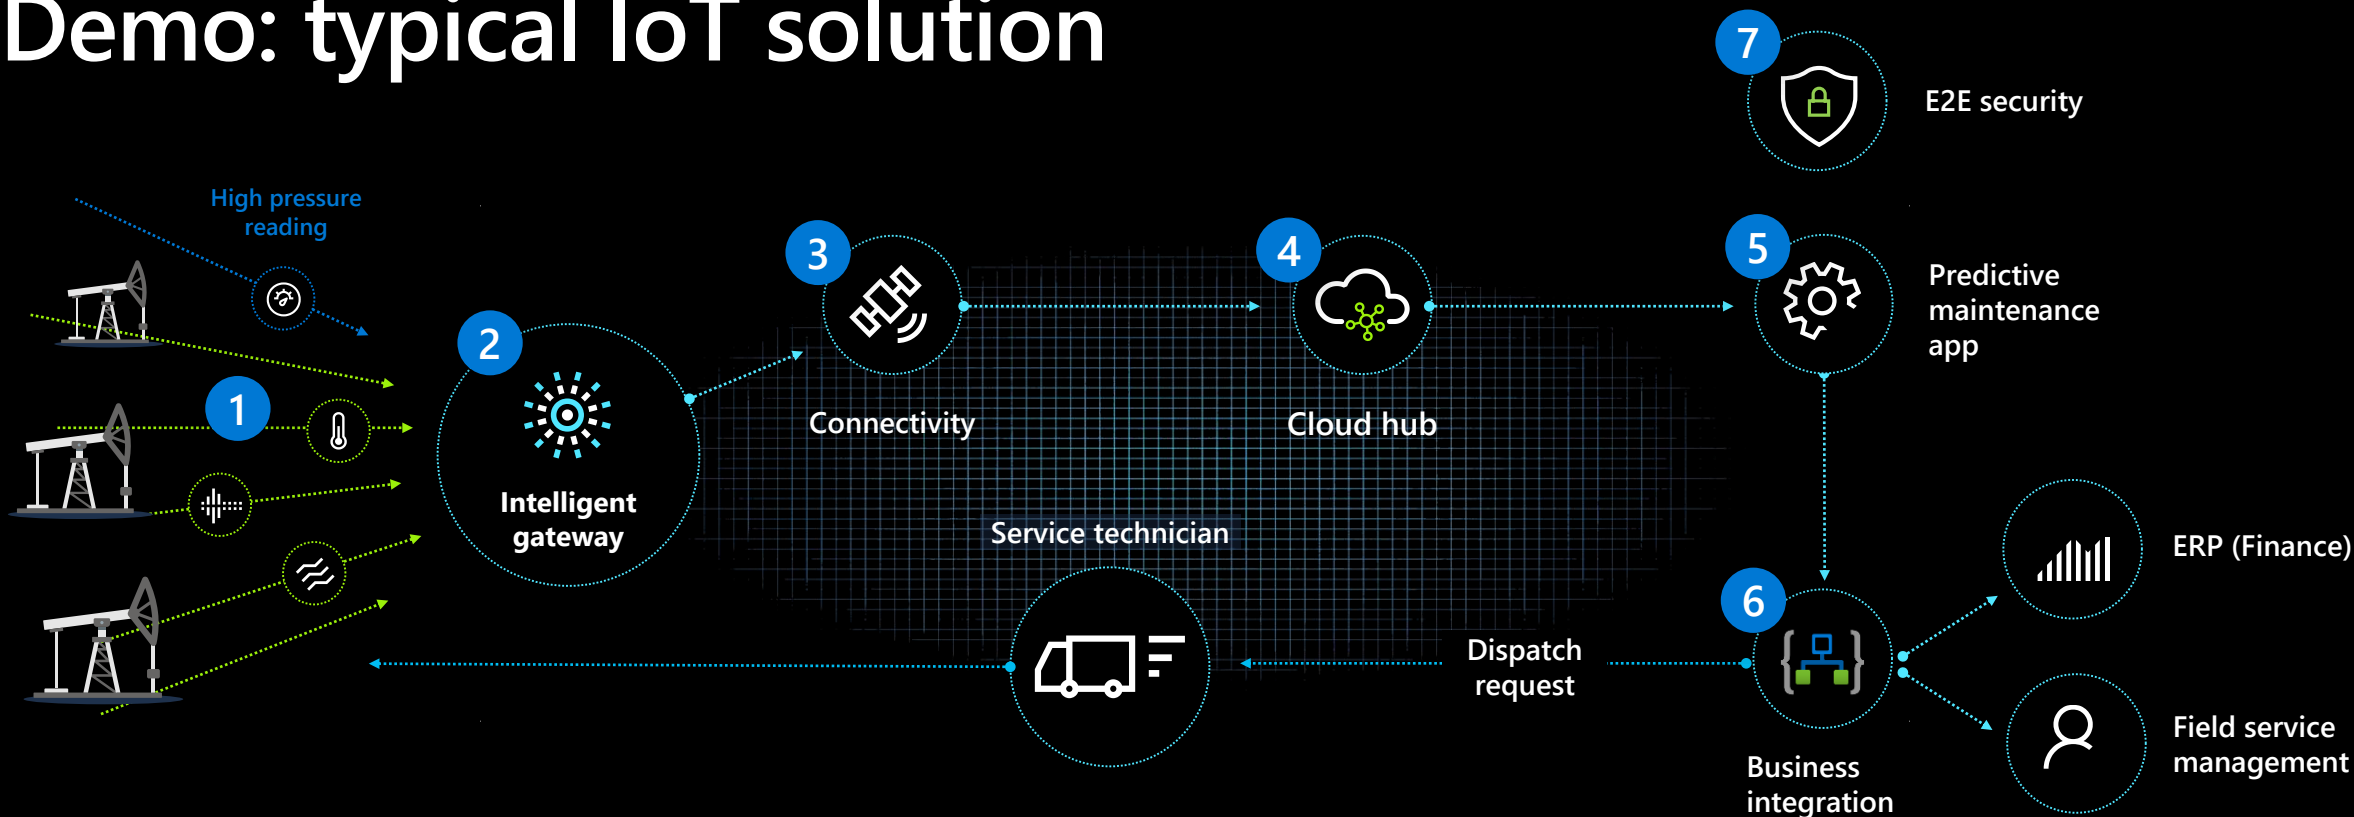

10 years of OS Support, security & manageability

Demo

Olivier Bloch
Azure IoT
Microsoft Corporation

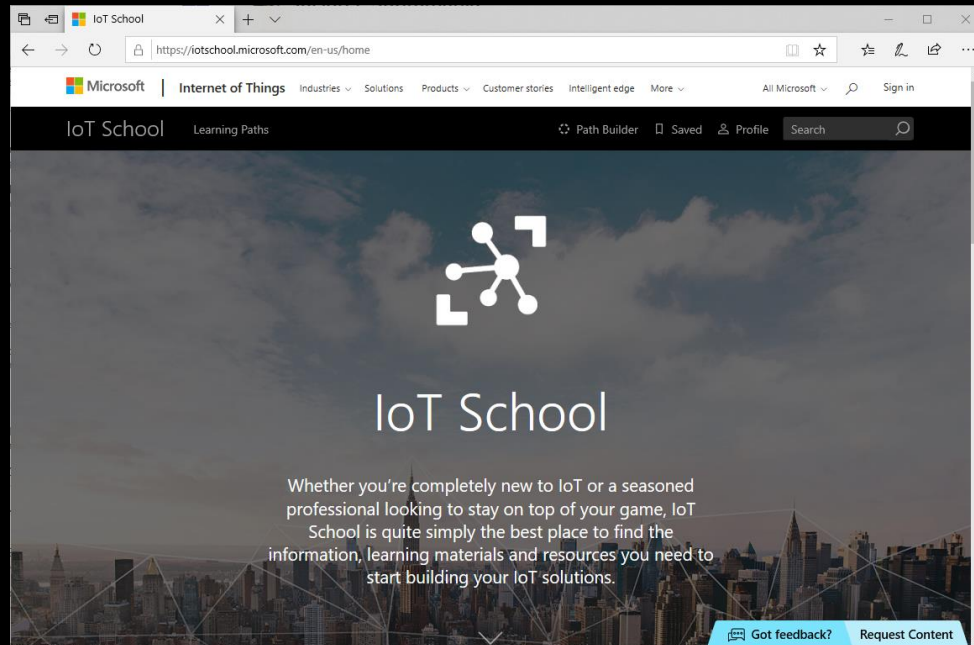

Demo: typical IoT solution

- | | | | | | | |
|---|--|--|---|--|---|---|
| Need to source and integrate sensors | Need to filter data and run safety workloads on the edge | Need to provision devices and get data back to the cloud | Need OT to have intuitive dashboard to manage and work with devices | Need to extract valuable insights from devices data in real time | Need to integrate into the business processes | Need to secure the solution from silicon to Cloud |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| A rich catalog of Plug and Play devices enables device ingestion | IoT Edge manages and executes intelligent workloads | Connectivity partners offer global Azure access | IoT Central makes it seamless to monitor and manage devices | Azure ML brings the power of AI into your application | Logic Apps connects to hundreds of business applications | Azure Security Center brings Microsoft's decades of experience in security |

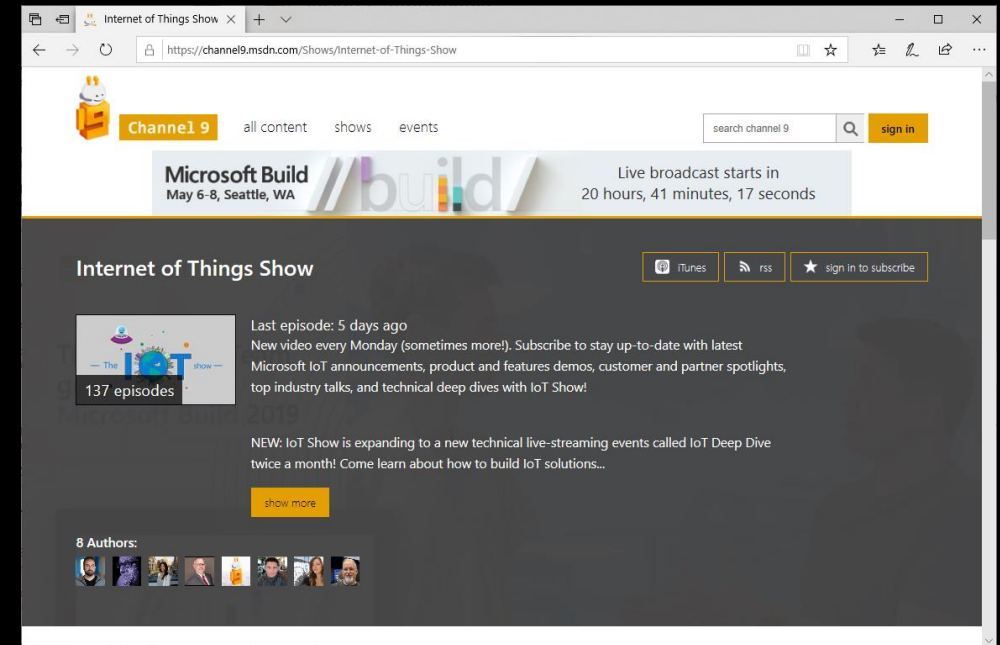

Great resources for developers

Ecosystem momentum

Vertical focus on co-sell Ready solutions (rich IoT services)

Prioritizing the most relevant customer solutions

1. Partner-led solutions

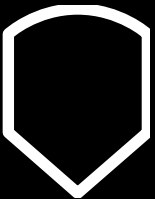

Industry	Vertical Solution Examples
Manufacturing	Condition Monitoring – Equipment Efficiency – Predictive Maintenance Operational Excellence – Grid Asset Management
Retail	Store & Customer Analytics – Distribution & Logistics Personalized Customer Experience – Inventory Optimization
Healthcare	Remote Patient Monitoring – Patient Analysis – Operational Analysis
Government	Urban Mobility & Transportation – Smart Cities – Security & Surveillance
Cross-Industry	Intelligent Supply Chain – Connected Field Service – Connected Products Smart Building Asset Tracking

2. IoT Co-Sell Ready Solutions Map

3. Microsoft Sales Force

4. Top customers by IoT propensity (IoT600)

Why choose Microsoft

Platform

Most comprehensive IoT services—mouse trap to nuclear power stations

Fast

Easy to build solutions

Ecosystem

Thousands of partner solutions across ISVs, advisories, systems integrators and connectivity providers

Powerful GTM channel

Relationships with the largest enterprise customers

Thank you
