IoT in Action

The IoT journey has multiple stages

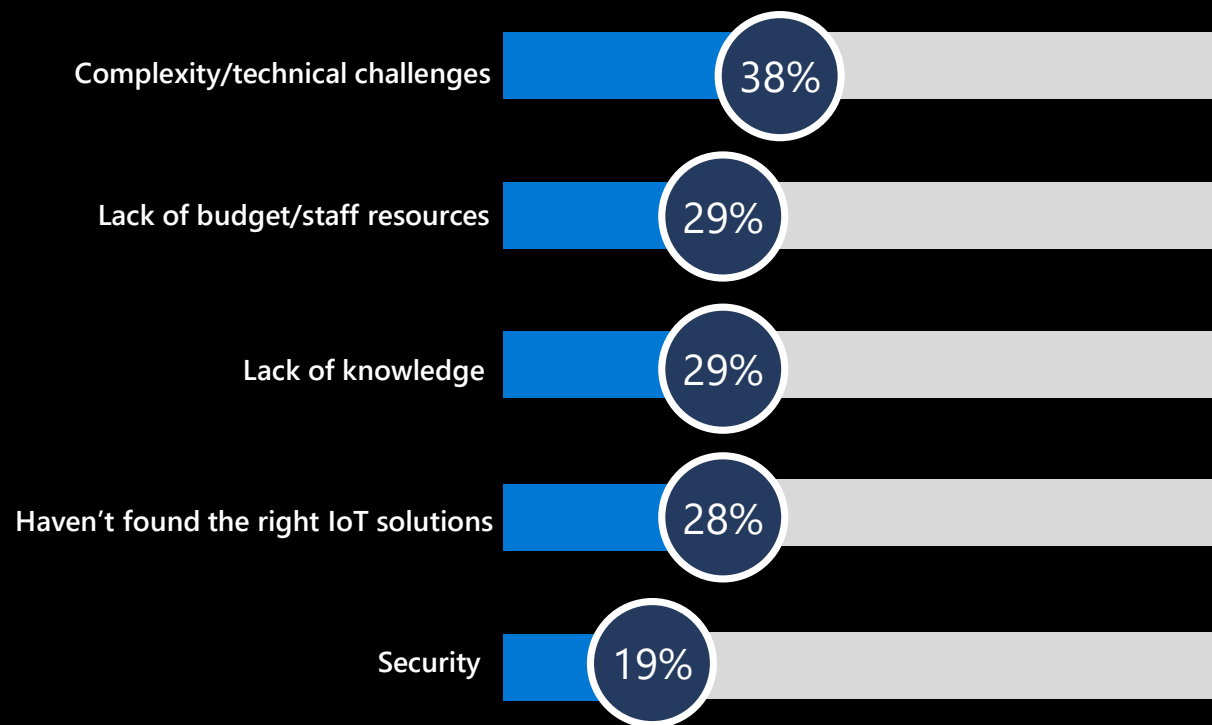

Each stage has dramatic benefits

IoT Signals

SUMMARY OF RESEARCH LEARNINGS
2019

Top challenges

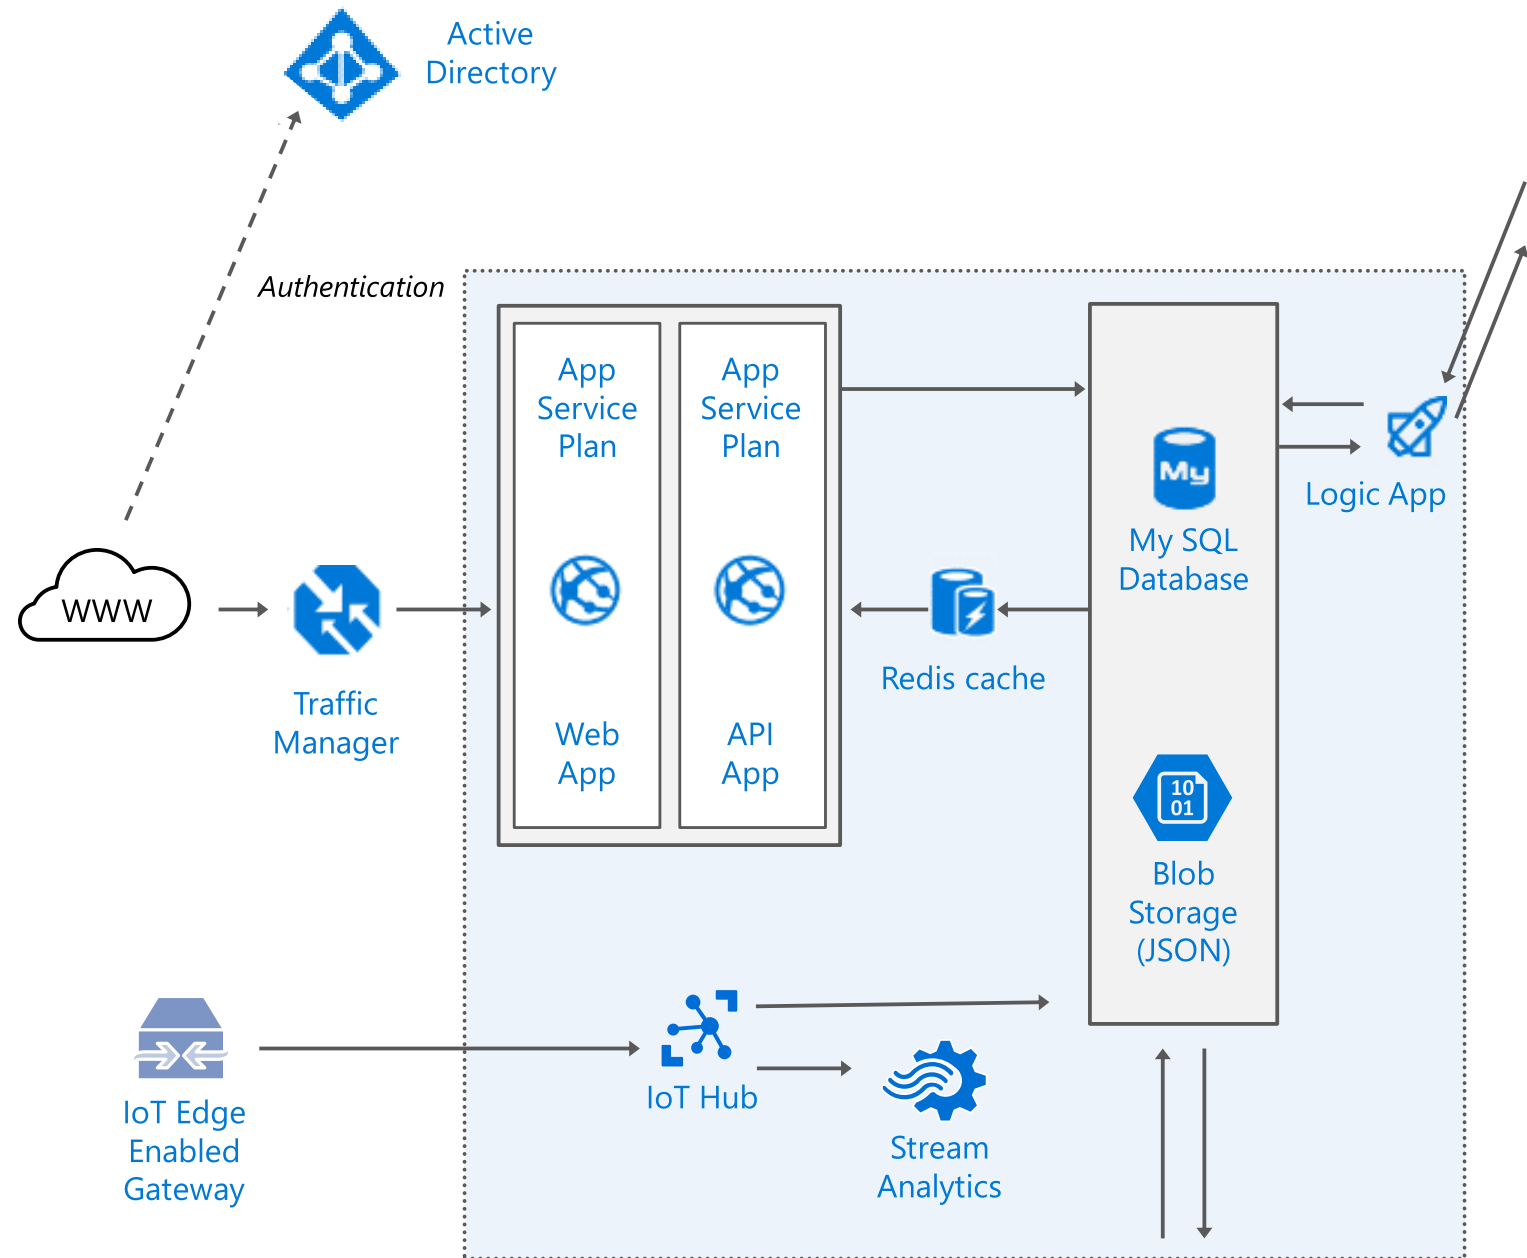

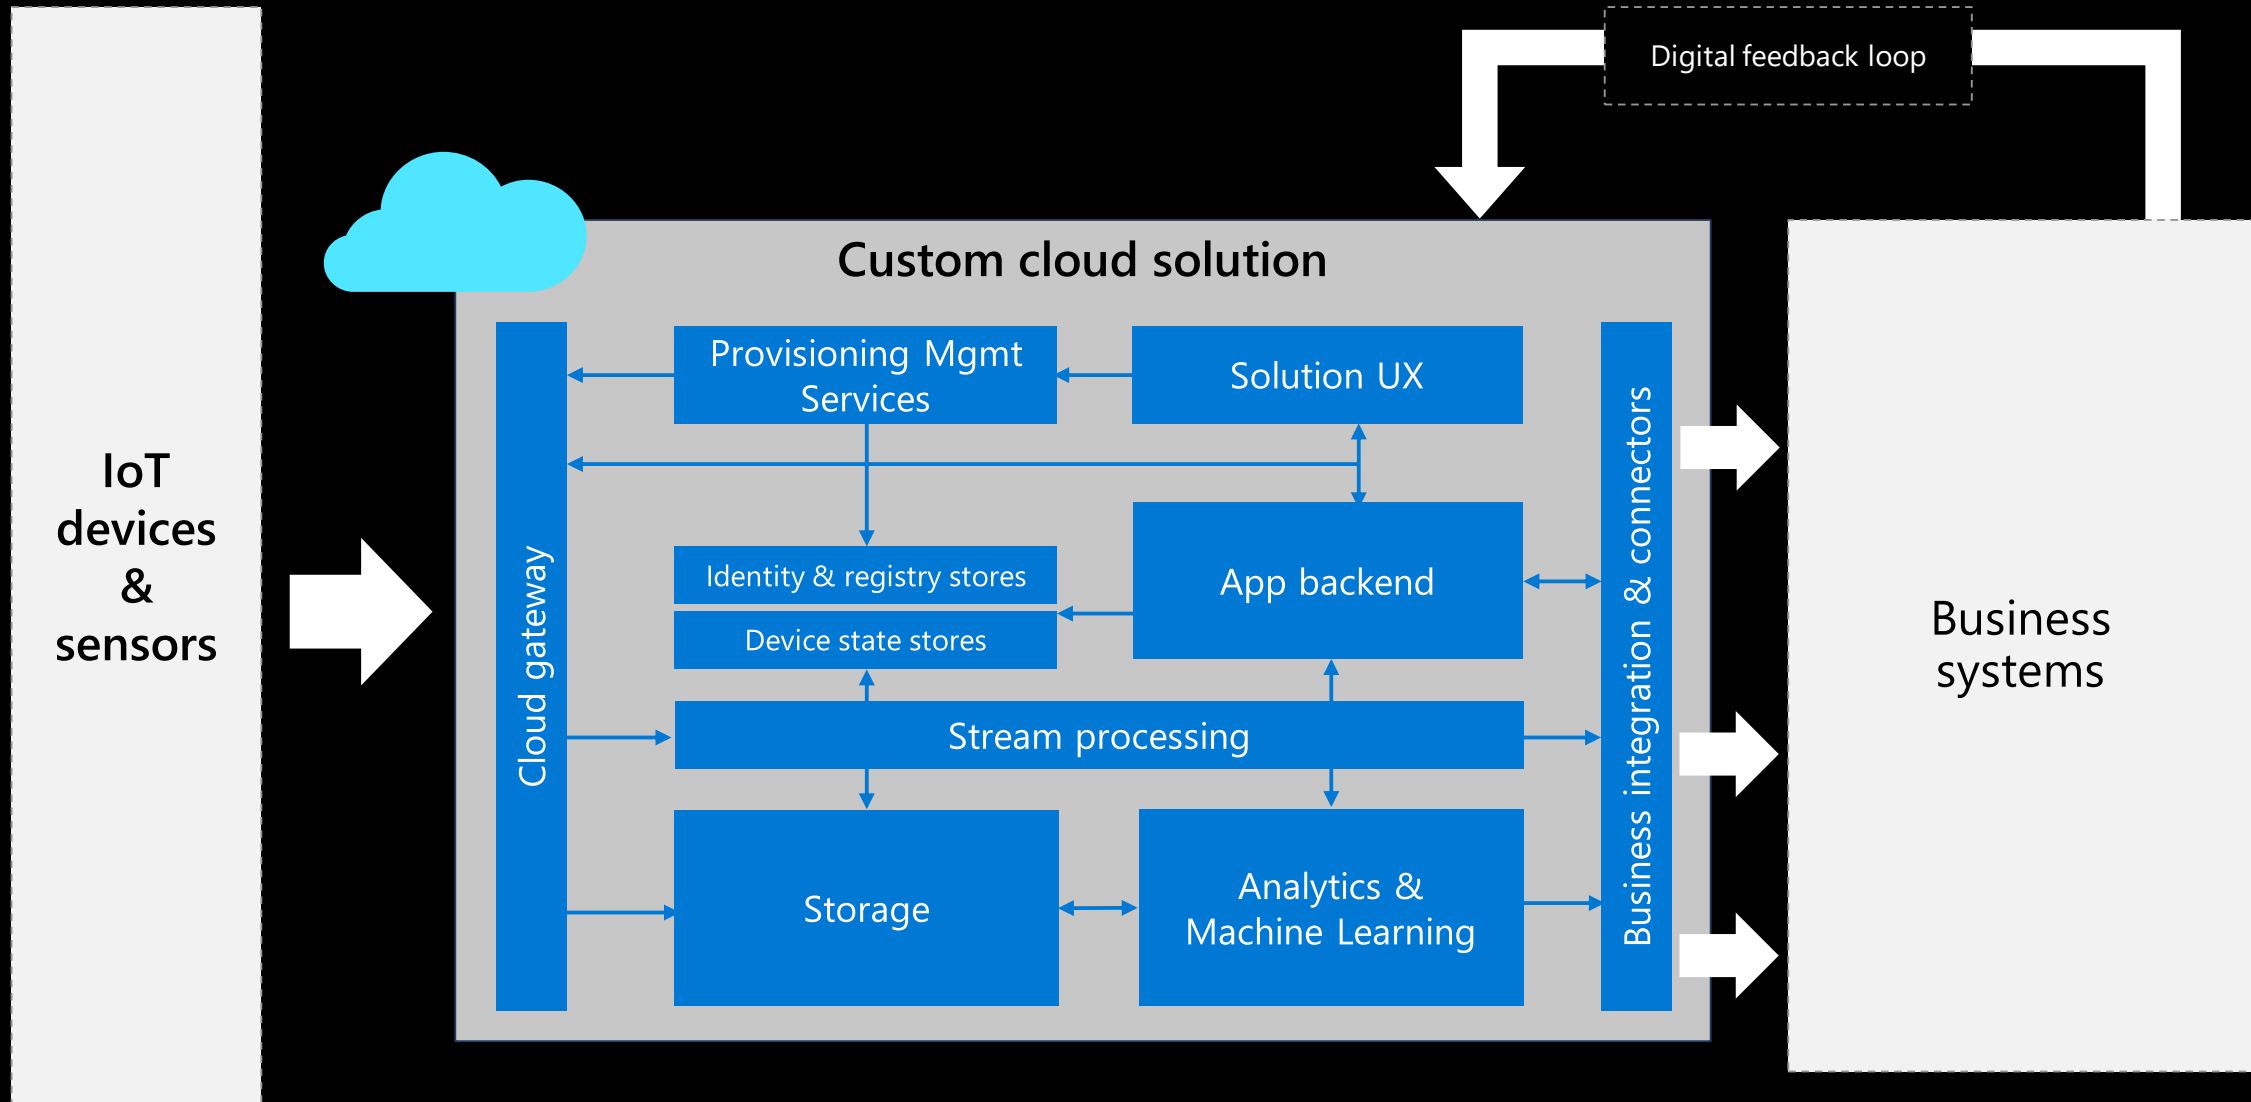

Architectural design sessions

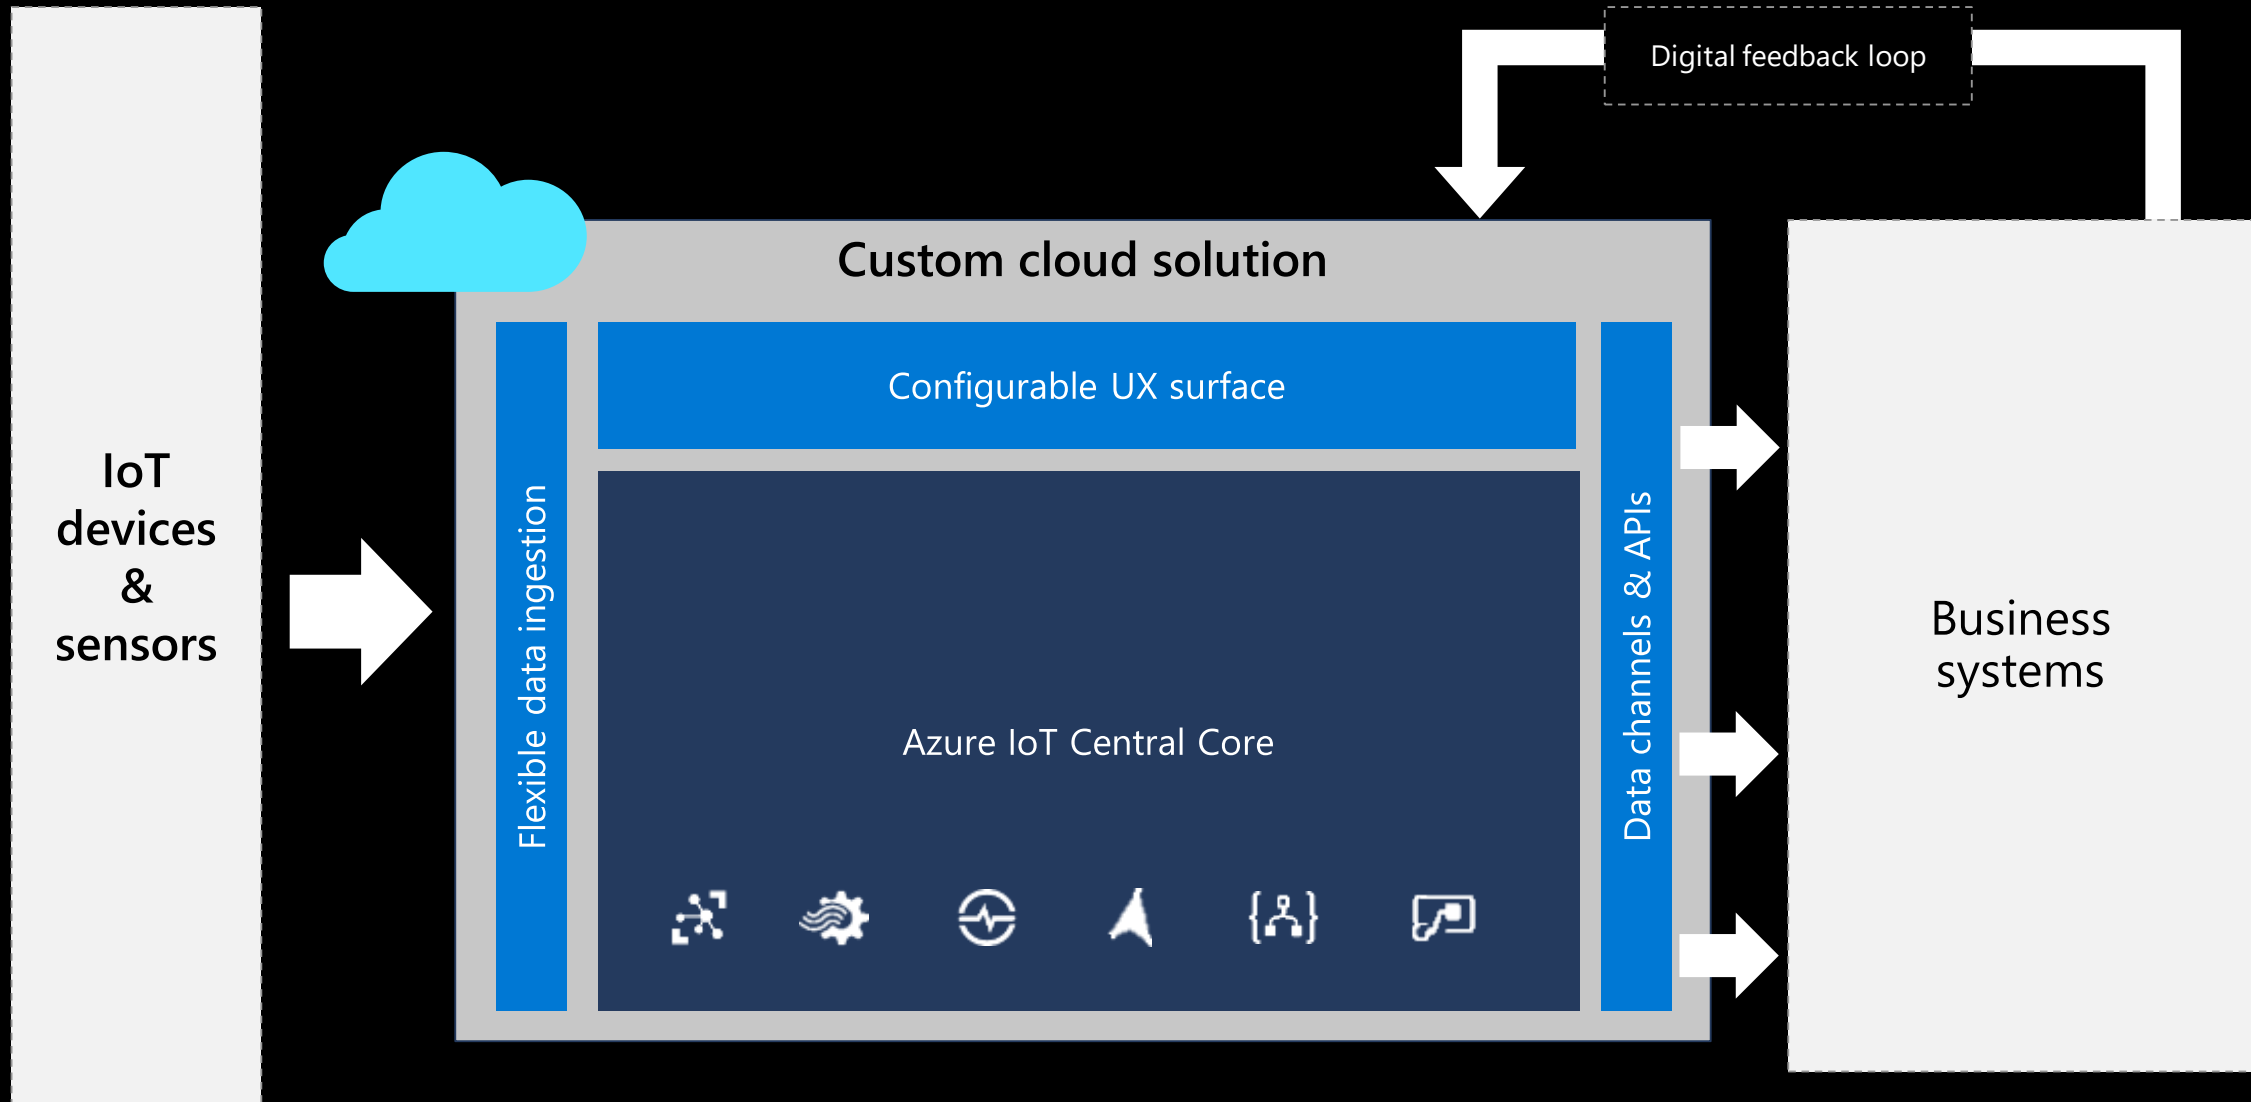

The output

Solution architecture - DIY

Solution architecture - IoT Central

Azure IoT Central

IoT app platform with security, global scale, high availability, disaster recovery built in

Device connectivity and management

Telemetry ingestion and command and control

Monitoring rules & triggered actions

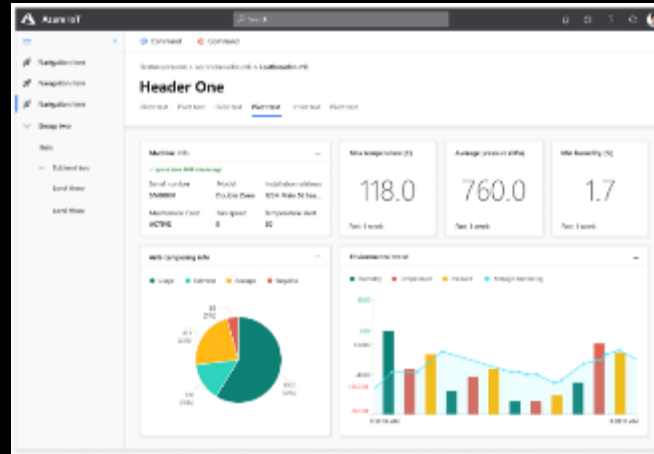

User roles and permissions

Dashboards, visualization and insights

Fully hosted and managed by Microsoft

Maps, location telemetry and geofencing

Device Bridge
Ingest data from other clouds

Continuous Data Export
Bring data into downstream business applications

White labeling
Your SaaS – Your Brand

IoT Plug-and-Play
Public Preview

IoT Edge support
Incl. Module Management

Multi-tenancy & RBAC

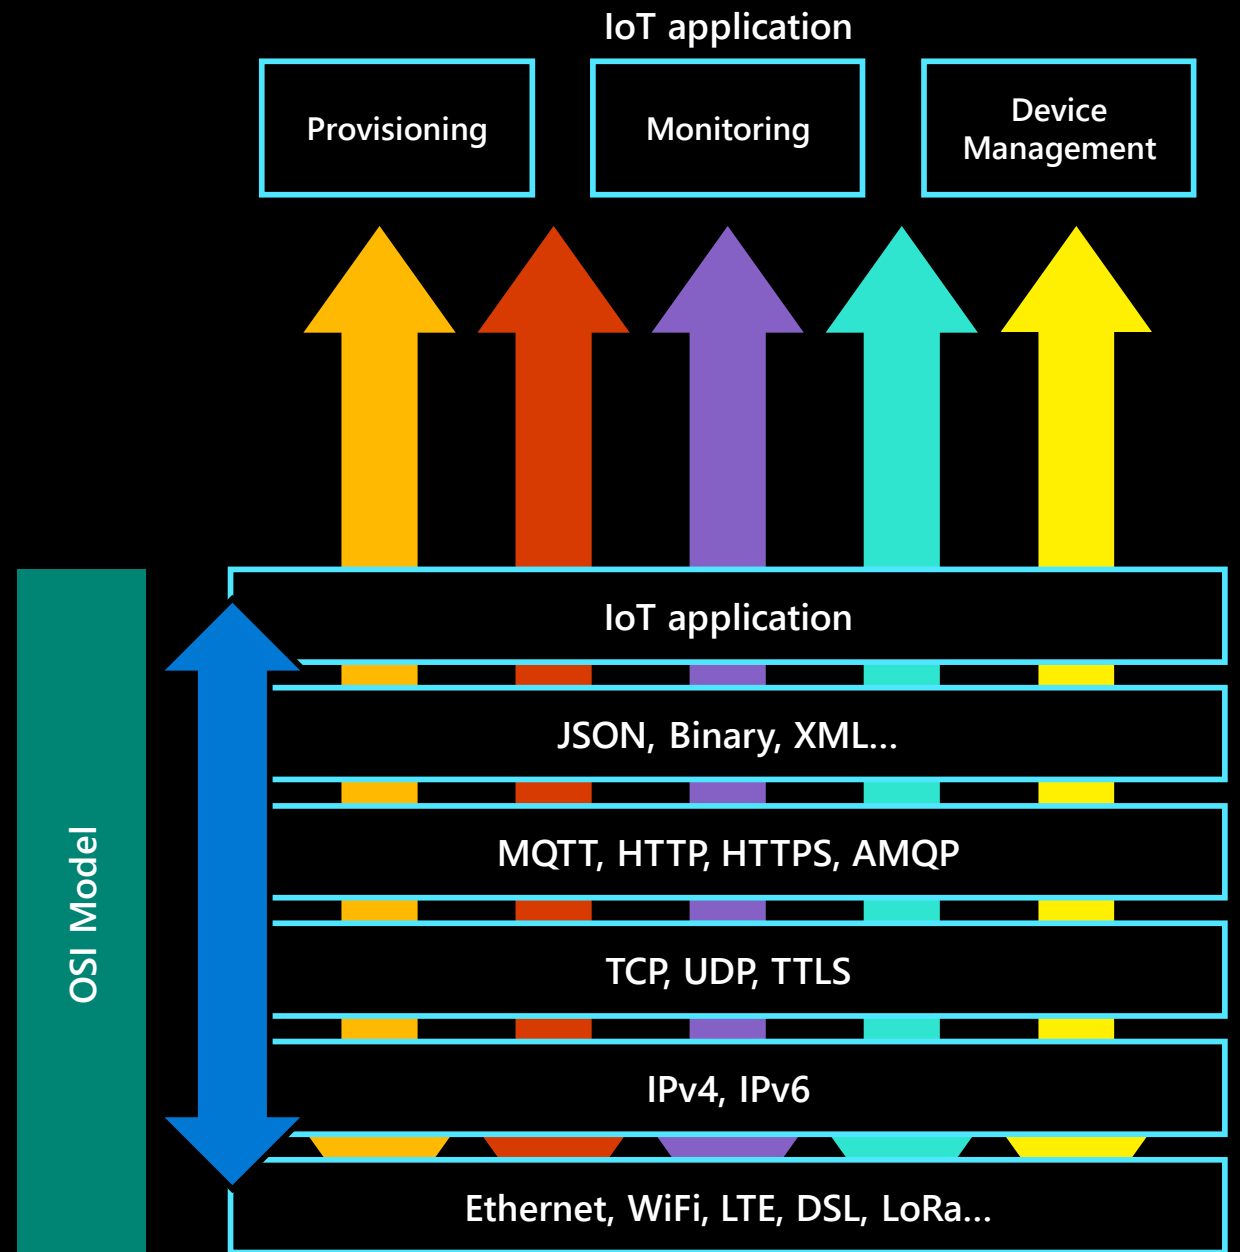

Extensibility
APIs

Solution Builder App Templates

Connecting hardware is very “hard”

Provisioning
Configuration
Device management
Deployment
Monitoring

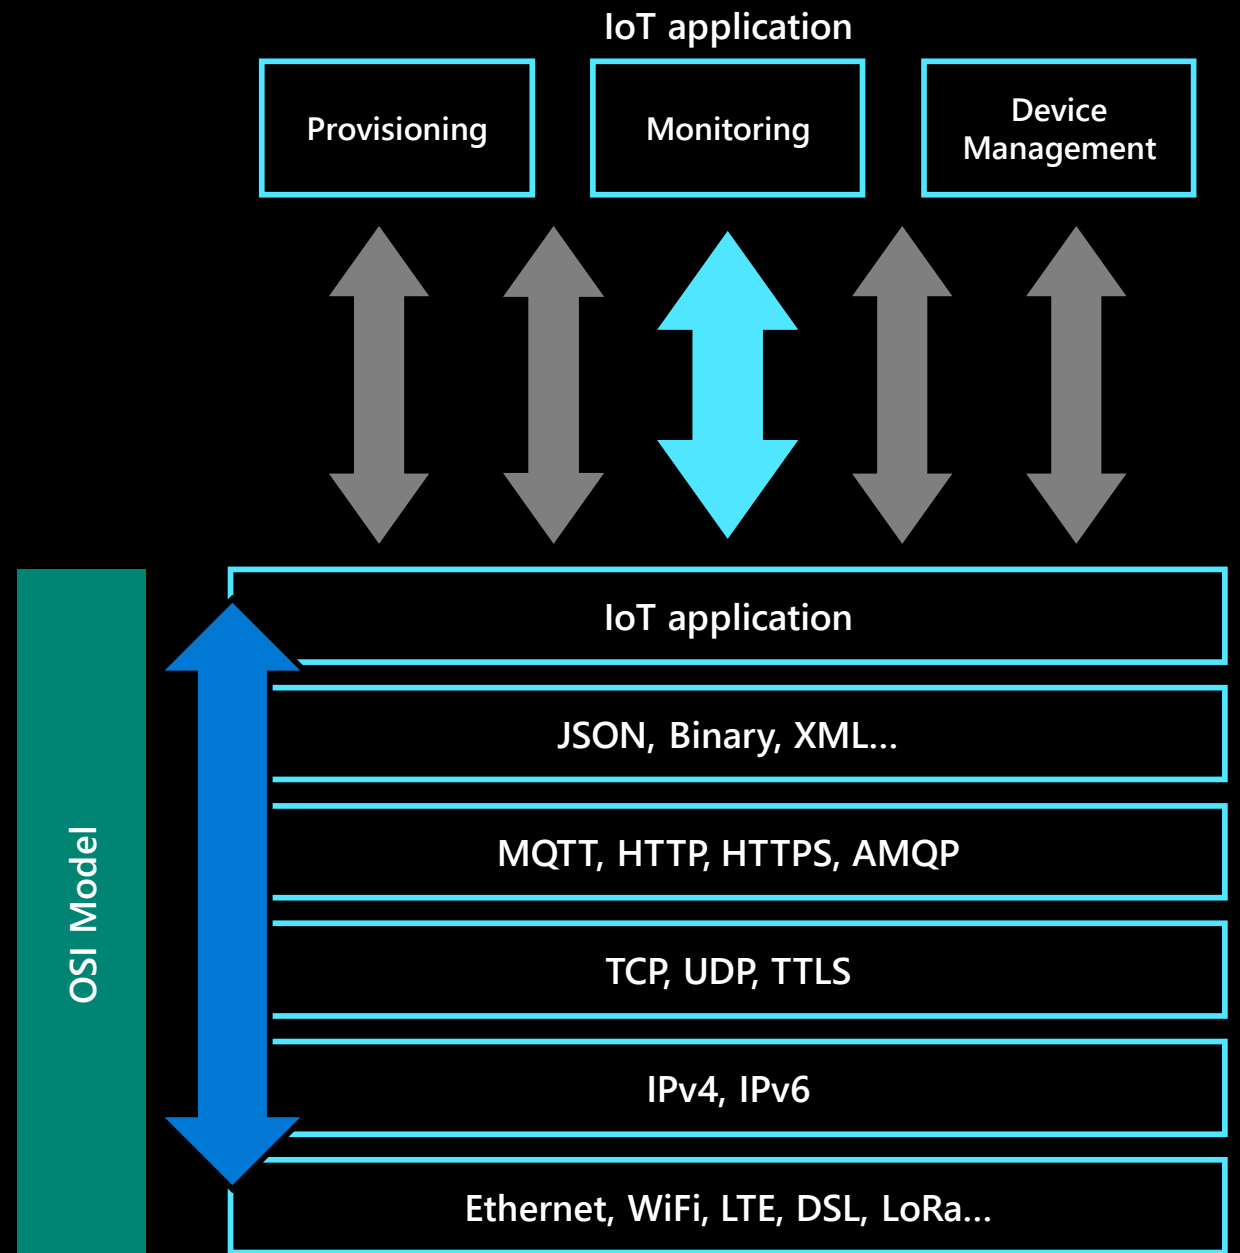

IoT Plug and Play defines common language

A platform feature to describe models and capabilities to Cloud

Based on Digital Twin definition language

Open source based on open standards (JSON-LD, RDF)

Benefits

Solution developers

Dramatically reduces the effort needed to build software on devices

Customers and partners

Large ecosystem of devices that just work with Azure IoT solutions, without any development required

Device builders

Certify your device for IoT Plug and Play and it can be used with thousands of Azure IoT solutions

IoT in Action

Problem Statement

* 2019 Art Basel and UBS Global Art Market Report

Problem Statement

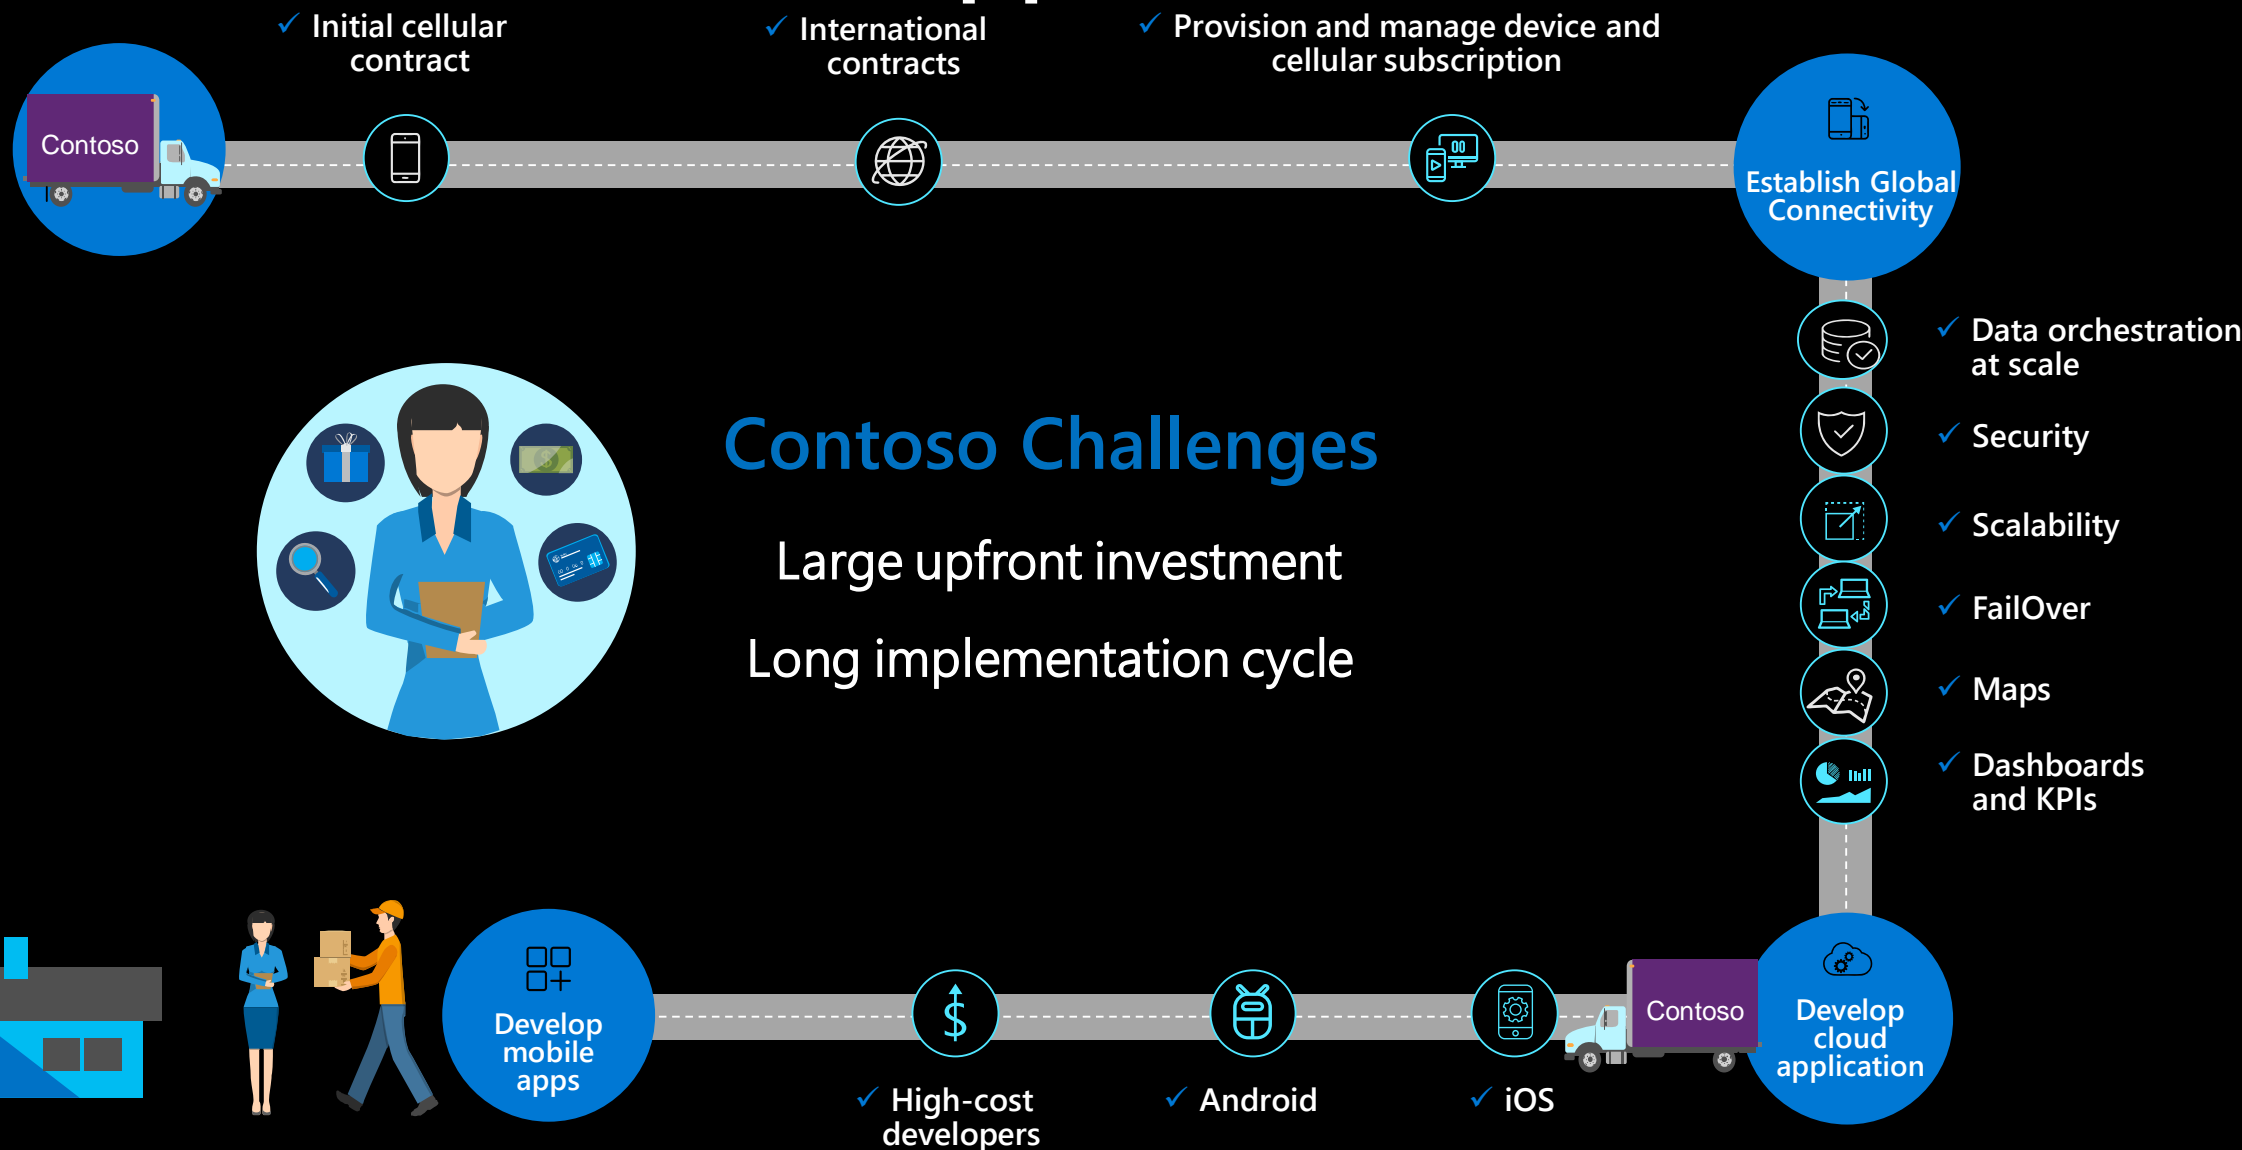

Worldwide shipments: require a global connectivity

Flexible hardware and software configuration
(sensors, thresholds, reporting rate)

Fast time to market and Fast End-user App development

End-to-end security and device management at scale

Reminder: Traditional Approach

Solution Provided by Sierra & Microsoft

- Global cellular connectivity
- Ready to connect pre-provisioned SIM
- Data orchestration
- Flexible Edge computing
- Edge sensors and devices ecosystem

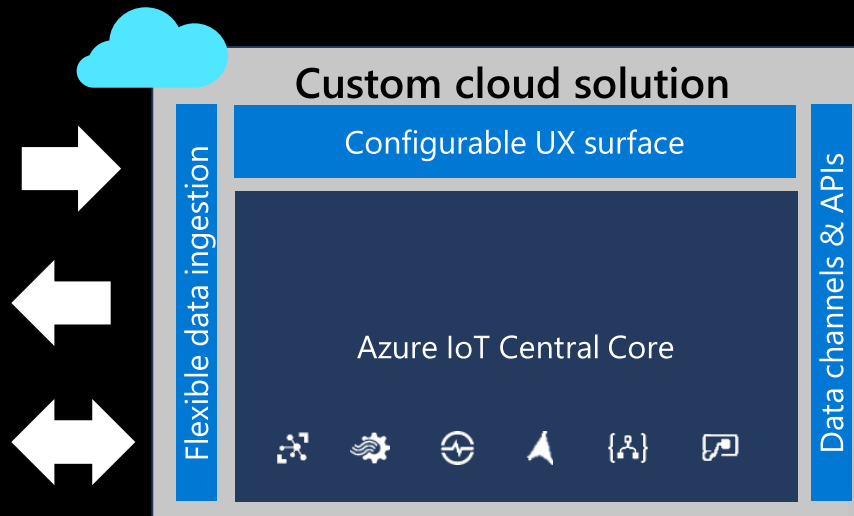

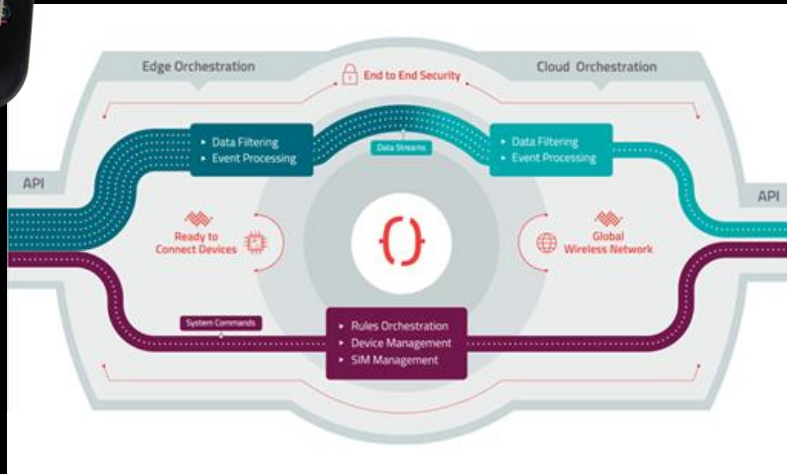

- Azure Cloud platform
- Power Platform: Mobile apps, BI
- Connected field services
- Connected workplace
- Microsoft partner ecosystem

Octave + IoT Central

Connect assets
using Octave

IoT Central

Develop App
using no-code Power Platform

APIs

Solution Provided by Sierra & Microsoft

SCALABLE

Avnet Integrated Solutions

Alastair Worth – IoT Director

AVNET[®] INTEGRATED

Avnet Integrated – What we do

Embedded Boards	Display Solutions	Embedded Systems	Appliances
System on Modules, Computer on Modules, Single Board Computers, Embedded Motherboards, Industrial Temp Motherboards, Wireless Technologies, Memory, Embedded OS	Industrial Monitors, Open Frame Displays, Touch Screens, Display Controllers	Industrials PCs, All-in-Ones, Memory, HDDs, SDDs, Chassis, Cooling Fans, SFF PCs, Wireless Technologies Storage Technologies, Embedded Operating Systems, Gateways	Branded Servers, Whitebox Servers, Server Chassis, Storage Arrays, Network Switches, Racks, Power Supplies, HDDs, SSDs, Memory, Embedded Operating Systems, Cooling Systems

Focus markets & applications

Embedded Systems	Industrial Automation	Medical	Building Security & Automation	Gaming	Transportation	Retail
	Printer HMI Control Pump HMI Control Machine Tool Control Power Station Control	Dialysis System Endoscopic Monitor Dentist Chair HMI Electrocardiography Device Image Analysis CT Data Transmission	Airport X-Ray Server Home Server IoT Gateway Home HMI Control Wall Mount Radio	Digital Table Display Slot Machine HMI	Flight Attendant Panel Tractor Driving Panel Railway Control System Helicopter Navigation Drone Control	Point-of-Sale Vending Digital Signage
Servers and Appliances	Network Security	Telco	Enterprise Storage	Media & Entertainment		
	Network Firewall Threat Detection Appliance	Session Border Controller Virtual Router Unified Comms Solution	Storage Appliance Storage Virtualization Secure Backup Appliance	Media Server Streaming Media Server Graphics & Branding Solution		

Customer case study

Post an IoT seminar hosted by Avnet we were approached by a well known highways maintenance provider to see how Avnet Integrated may be able to help them apply IoT technologies to digitally transform their surveying and man-power based business.

The Result

Customer Challenges

HOW TO **MONETIZE** THE IDEA

HOW TO **ARCHITECT** THE
SOLUTION

HOW TO **BUILD** THE SOLUTION

HOW TO **SCALE** THE SOLUTION

Tools used:

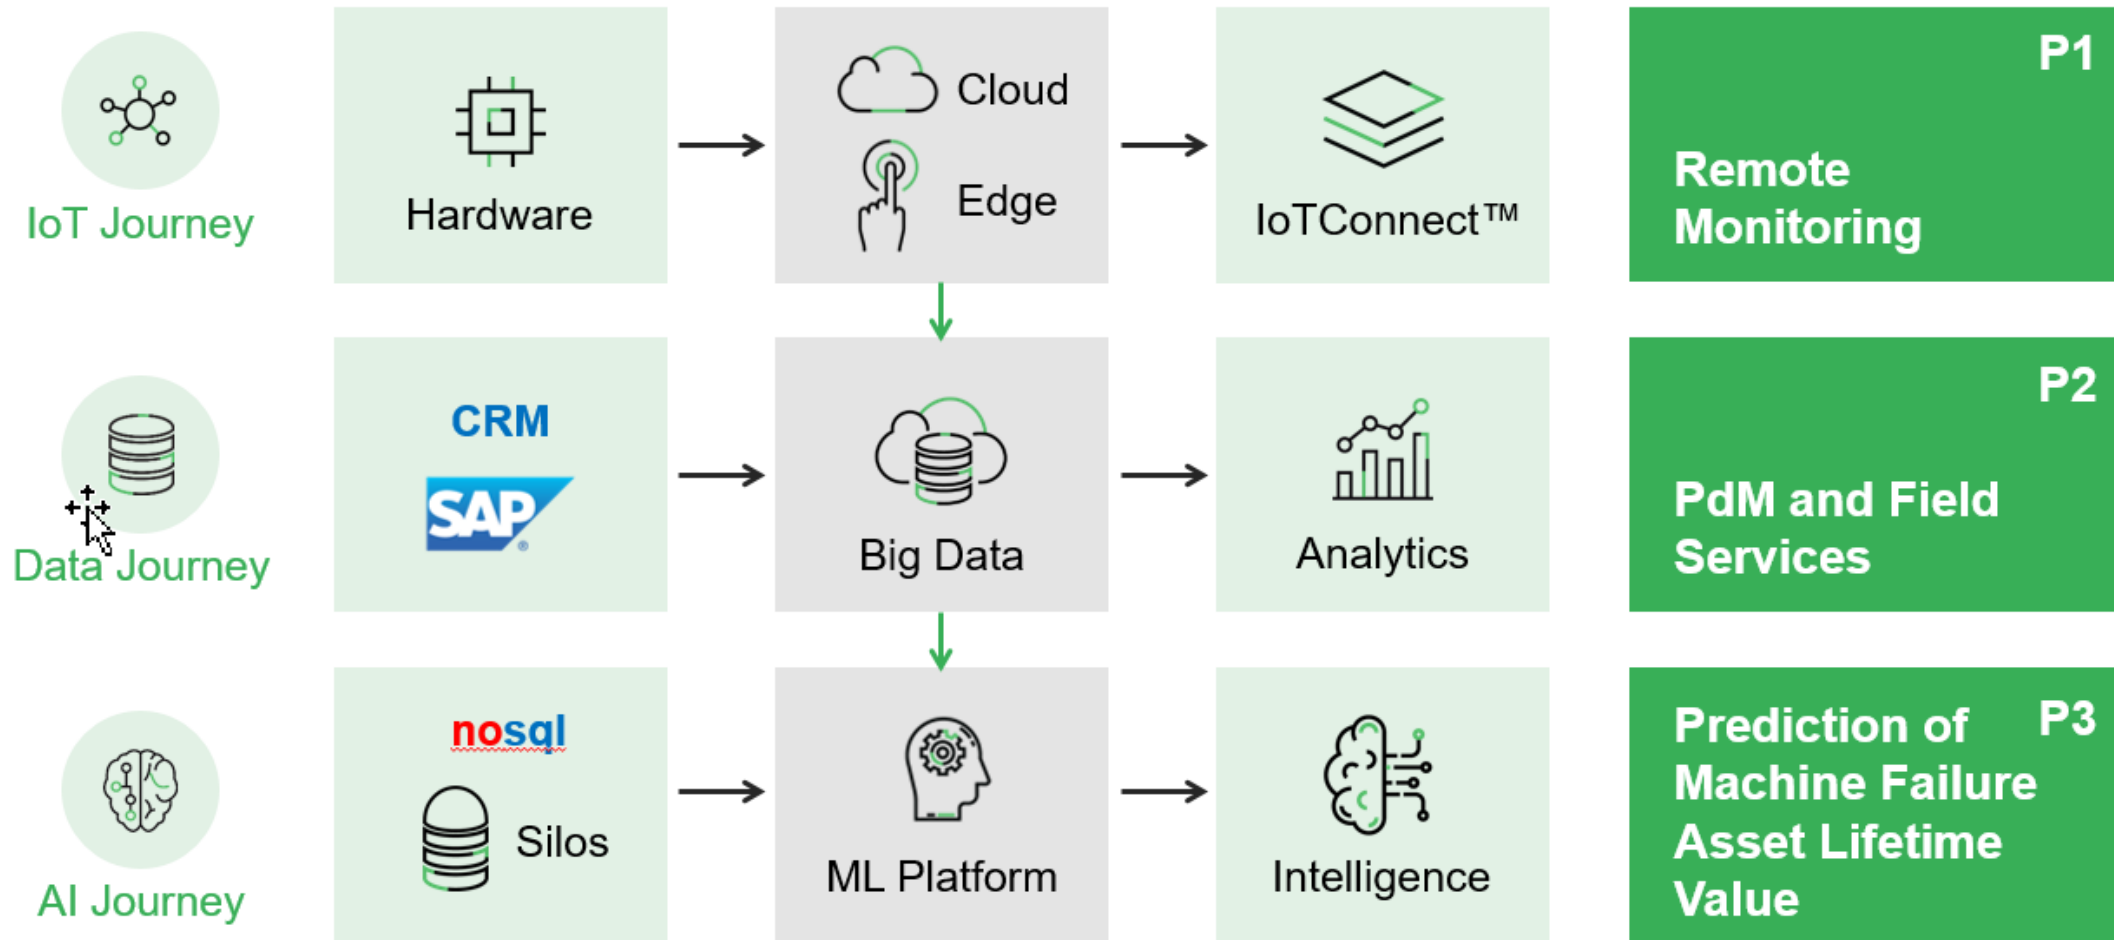

Build With Program: Business model workshops

Build With Program: Architectural consultancy

Avnet Integrated: Design, Labs and BDM teams

GTM: Marketing Tune up and sales readiness

IoT Connect: A quick demo
