Partner-led

Customer relationships

Partnerships

These disruptions
are occurring across
all industries

4 steps of Digital Transformation

1. Business insights

Sensor proliferation

Data collection, transfer, storage and processing

New insights—
understanding product
and service more deeply

2. Operational efficiencies

Performance & quality
improvements

Predict the future based on past
data patterns

Cost reduction

Predictive maintenance

3. New business models

Provision of services
alongside devices
and hardware

Devices/hardware/machines
delivered "as a service"

4. Features and rev streams

Enablement of ancillary
businesses, new businesses and
transformed businesses
