France AI Plan

France AI Plan

AI INNOVATION

Promote the growth of five strategic ecosystems: health, environment/energy, transportation, financial services, and agri-food

- **Foster and Shape breakthrough projects/solutions** opportunities and engage with key players on 5 Ecosystems
- **Accelerate Innovation via AI Factory**
 - Support AI Start-ups ecosystem, accelerate co-innovation with corporate
- **Leverage Applied Research via INRIA partnership** to drive innovation and business growth with strategic customers ; Participate in PRAIRIE (PaRis Artificial Intelligence Research InstitutE) to build bridge between research and Industries

AI Innovation

AI Impact

AI Impact is a think & Do tank with Microsoft customers and partners **addressing the ethical and societal challenges of AI** by reflecting on issues related to health, transport, energy, environment, food and accessibility. Support innovative projects to **positively impact the world of tomorrow** and publish recommendations to foster the emergence of a responsible AI

AI Skills

The objective of the **AI Skills** program is to **train 400,000 people over three years**, with the **creation of 3,000 new jobs** in the French digital ecosystem

Address Digital, coding and AI awareness for kids

Professionals: with top partners (Adecco, Manpower, Global Knowledge and Pole Emploi) drive reskilling/upskilling

- NEETs (Not in Education Employment or Training) Professionals: Build and develop **AI Schools** as a “franchise” for partners and LRG to leverage

Evolution of industrial systems

Mechanized systems

Powered by **steam or electricity**

Manually operated

Automated systems

Powered by **software**

Fixed operation

Autonomous systems

Powered by **AI**

Sense – Act – Learn - Adjust

Intelligent Edge

We are living in an
automated world

ALTAMETRIS : l'IA pour gagner du temps et augmenter la précision des résultats

Enjeux

- Traiter d'importants volumes de données, les classer, et les sélectionner pour avoir une grande précision dans les résultats
- Distinguer l'information utile pour détecter les défauts de composants et assurer la maintenance préventive et prédictive des sites industriels

Solutions

- **Drônes**: pour capturer les données
- **Intelligent Edge et Microsoft Azure** : traitement, stockage et analyse des gros volumes de données
- **Viséo** : algorithmes permettant d'anticiper l'état de composants industriels

Bénéfices

- Production d'informations utiles, pertinentes et précises pour les collaborateurs du groupe
- Gain de temps et de productivité
- Réalisation d'économies sur la maintenance et la modernisation des équipements grâce à l'anticipation des défauts

ALTAMETRIS

« L'information délivrée doit être ultra précise avec une marge d'erreurs maîtrisée. Intelligent Edge et le Cloud Azure IoT nous permettent de répondre à cet objectif de perfection »

— **Nicolas Pollet**, Directeur Général - ALTAMETRIS

Digital Engineering and Manufacturing Services

WE ARE

- **DEMS, as part of Capgemini**, the leader of physical and digital worlds convergence,
- The best partner providing digital experiences through technology, engineering and manufacturing expertise,
- Focused on delivering sectoral key offers :

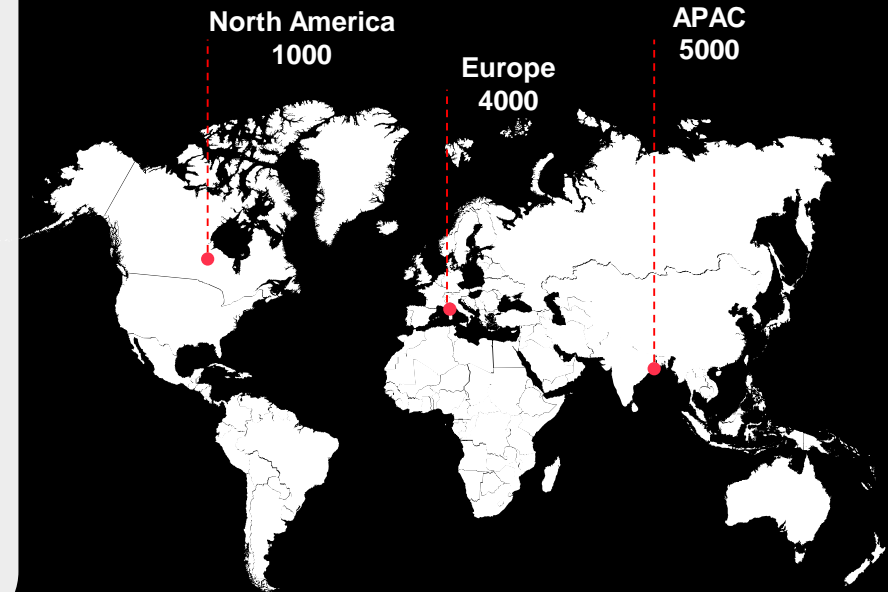

Connected Products

Smart Engineering

Digital Manufacturing

WE AIM AT

- Addressing the complete product development + experience value chain
- Partnering our industrial customers in their innovation strategy, help them finding the best fitted solution to their needs
- Being the best fellow player supporting Industry 4.0 transformations

**Delivering engineering solutions
for over 30 years through a mature worldwide Delivery model:
Rightshore relying on 4000+ FTE Indian base dedicated to DEMS**

Capgemini – « École IA Microsoft »

Capgemini is expanding its AI capabilities with Microsoft through a series of strategic services aimed at helping enterprises to accelerate their adoption of AI technologies. The new services include AI Engineering for production-grade Data and AI platforms, AI for Operations Intelligence and AI for Customer Experience.

Some of our mixed reality credentials

Aerospace

Holographic academy AR/VR developments:

- A350 Cockpit Harness Mounting
- Aircraft Cabin Configurator
- Training for newcomers...

<https://www.youtube.com/watch?v=sVmJEihFD0>

Space

Projective augmented reality to support satellites assembly phase:

- DMU data reuse
- Diota technology integration for 3D tracking
- Projection for free hands use
- Reporting...

Automotive

Assembly training for car dashboards (HoloLens/3D tracking/Surface Pro):

- Unity multi-platform application dev.
- Step by step mounting display
- Completely Configurable

<https://www.youtube.com/watch?v=V0WrCf8PbEk>

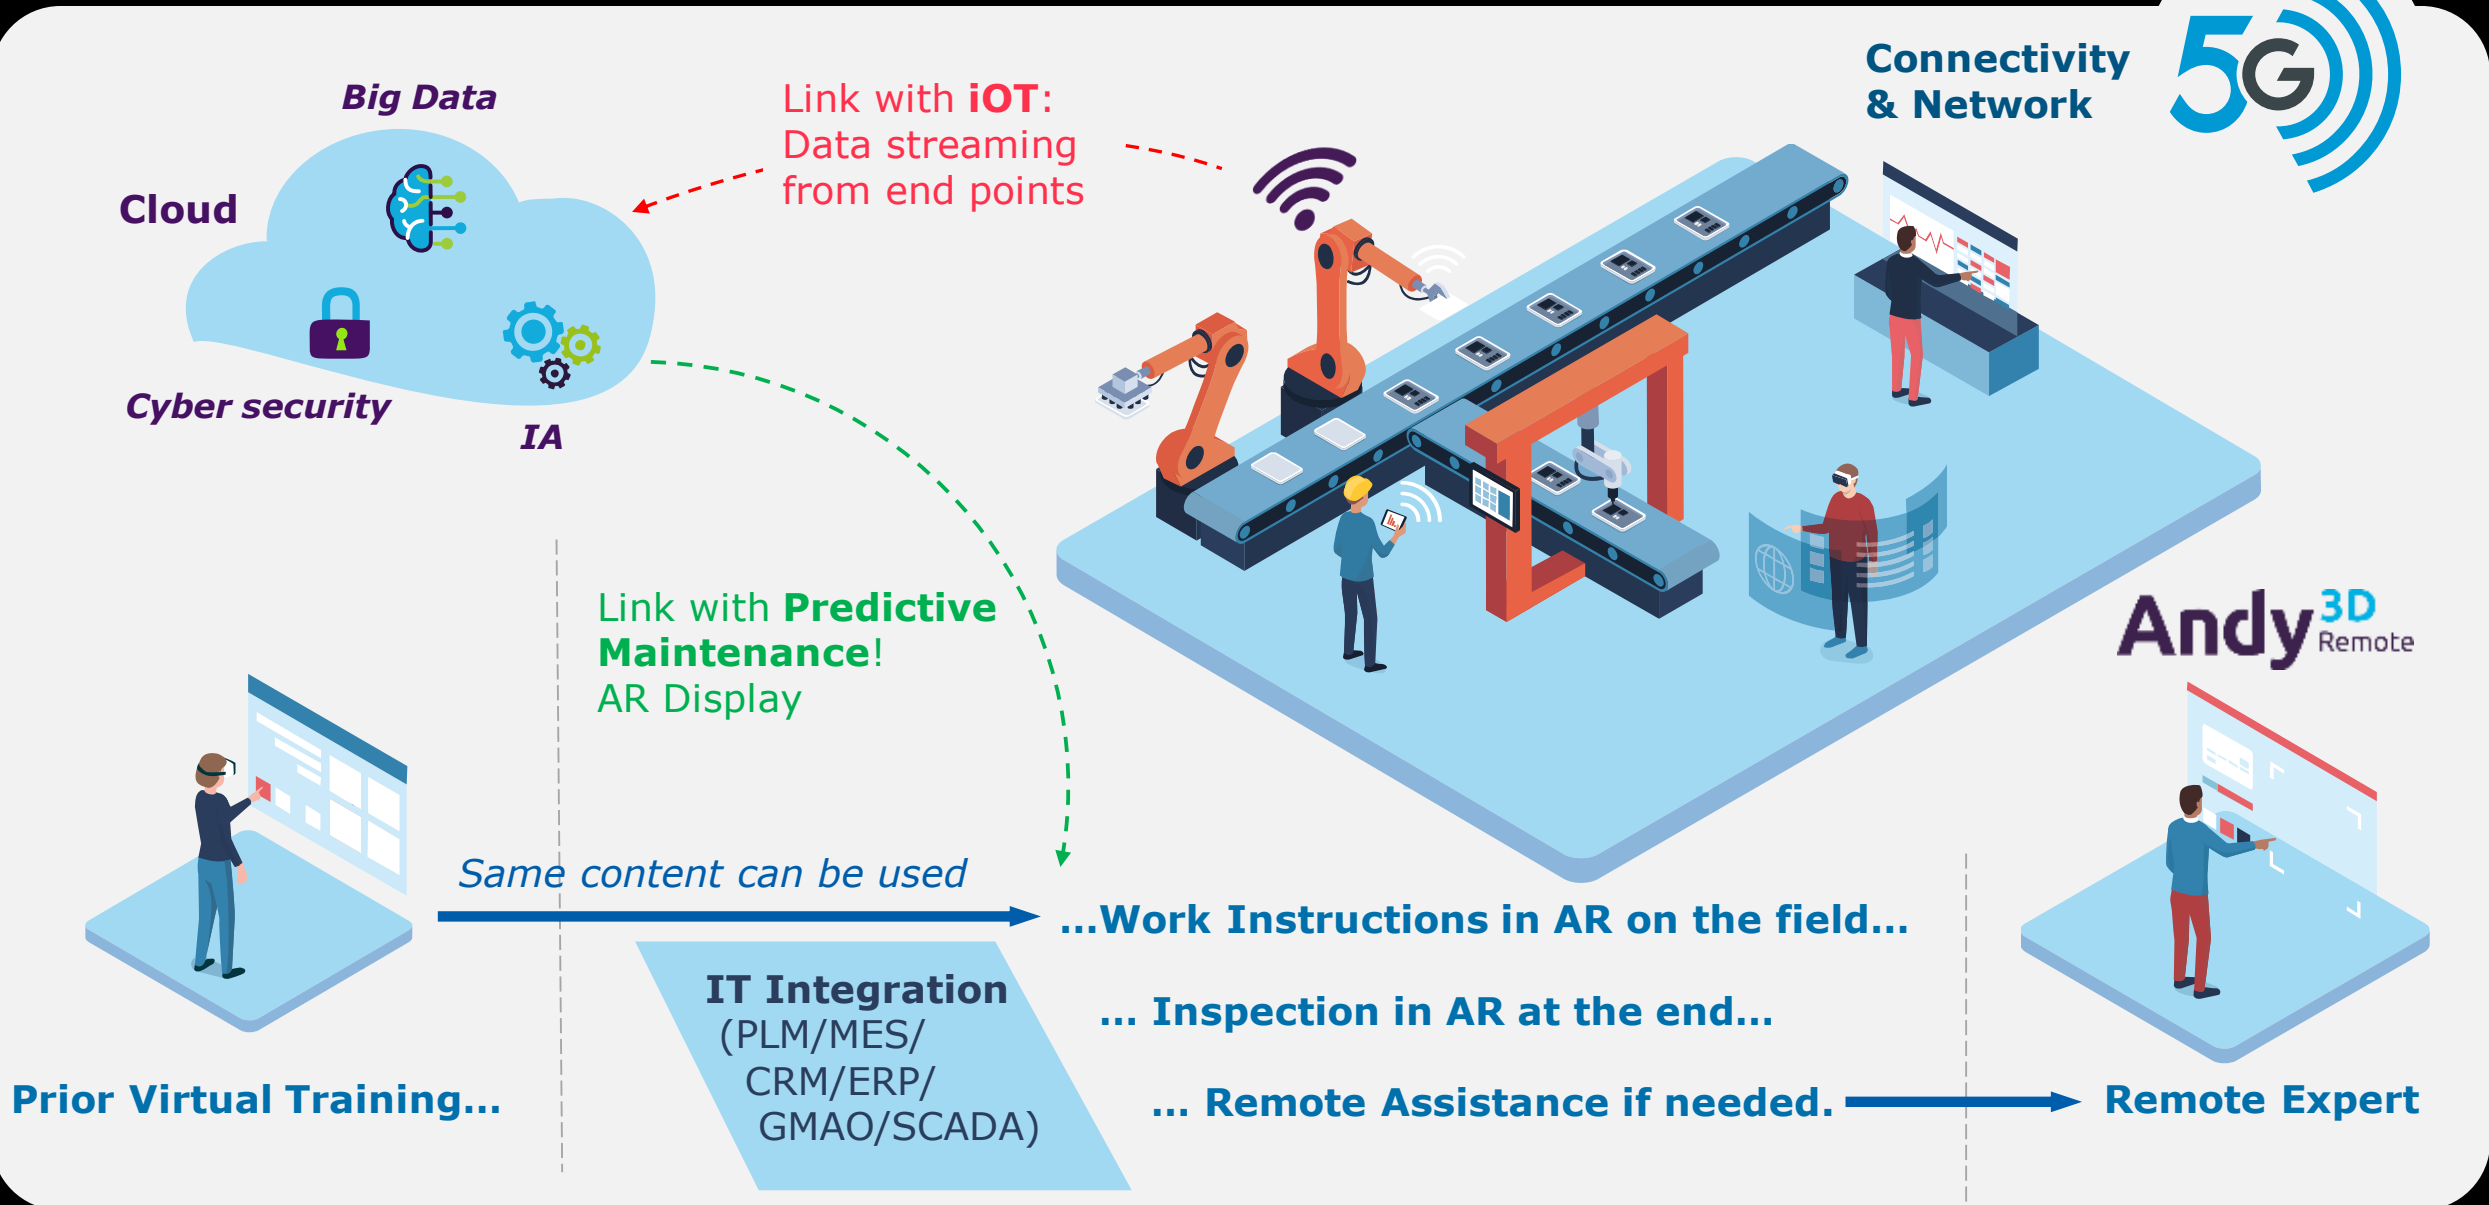

Automotive

Cabling Inspection in Augmented Reality (HoloLens):

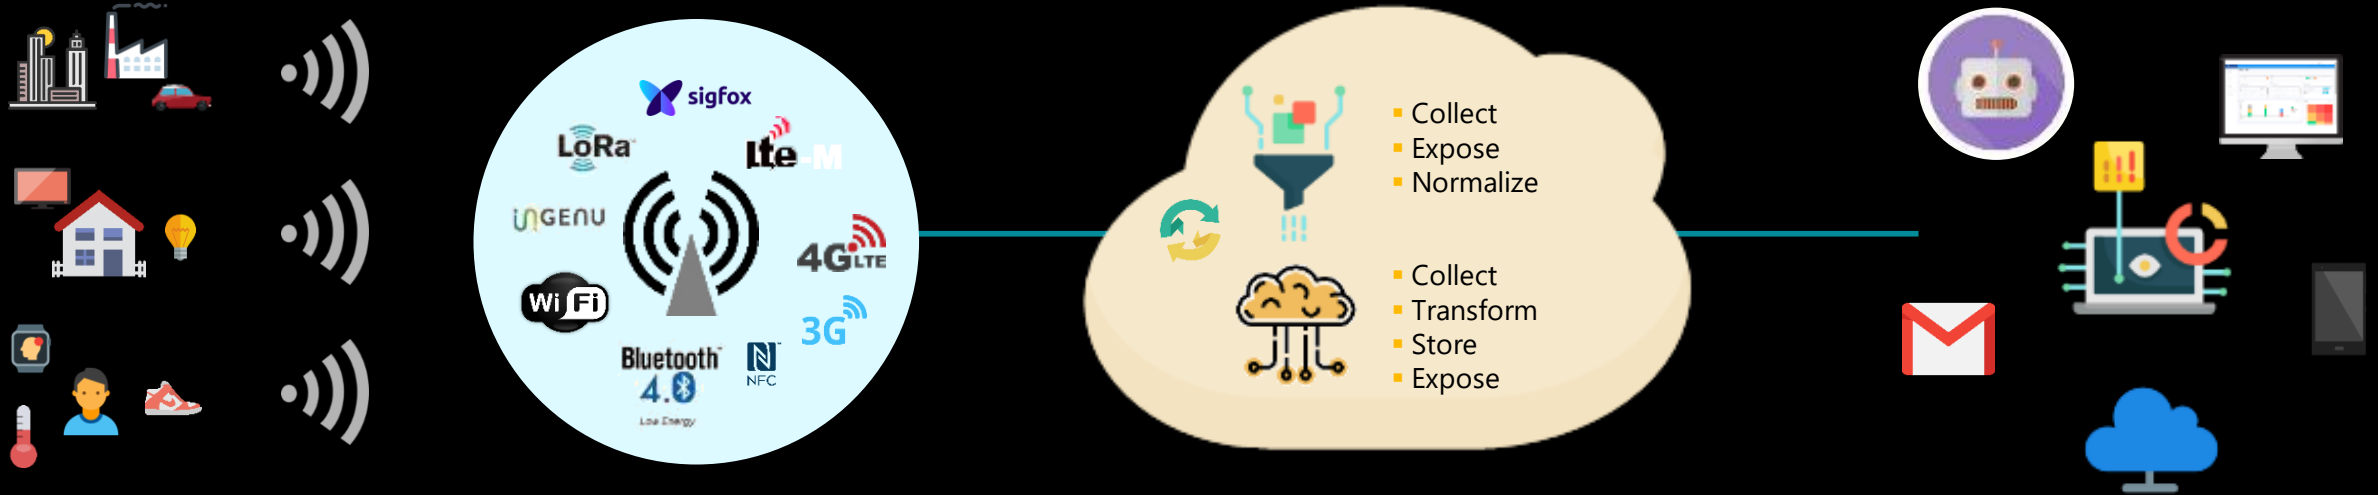

- A lot of different configurations
- Improve efficiency
- Reduce error rates, time, costs & expertise dependency

TOTAL – IoT platform for industries

TOTAL has deployed IoT solution to monitor industrial assets for RC – EP – MS.

The challenge now is to deploy a device management solution to industrialize the solution

Capgemini deploys the Device Management Solution- X-IoT- integrated in Azure IoT bricks to provide an end to end IoT solution in an industrial context

The Ingestion platform aims to enable a secure, reliable, industrialized, agile and easy data collect from IoT sensors deployed on industrial assets or other assets of the group
The IoT Ingestion Platform is an entry point and gateway between IoT devices and the Information System

The platform should provide all the necessary features to handle the complexity of connecting, managing IoT devices at scale

Proper management and versioning of the schema describing both the properties of devices and the content of messages

- Reliability, scalability and services for final customers is disrupted according huge hotline and support costs.

The solution provided by Capgemini is :

- Full architecture based on our X-IoT platform: hardware, protocols and communication, cloud to identify bottleneck
- Mitigation action and roadmap following several scenario, short- and long-term solutions.
- Pilot project for technical validation :
 - The solution is hosted on Microsoft AZURE cloud infrastructure
 - Data is collected using secured MQTT protocol
 - The device management is provided by the Capgemini XIoT platform
 - X-IoT integrates a Lora Server & Sigfox connector to manage LPWAN network.

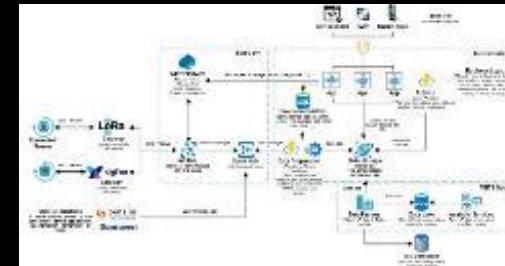

Securing: allow to gather data from industrial devices deployed in refinery

Manage data flows & devices: providing firmware update and devices management

Performance: Build a scalable Architecture able to manage the ramping up

About Capgemini

A global leader in consulting, technology services and digital transformation, Capgemini is at the forefront of innovation to address the entire breadth of clients' opportunities in the evolving world of cloud, digital and platforms. Building on its strong 50-year heritage and deep industry-specific expertise, Capgemini enables organizations to realize their business ambitions through an array of services from strategy to operations. Capgemini is driven by the conviction that the business value of technology comes from and through people. It is a multicultural company of over 200,000 team members in more than 40 countries. The Group reported 2018 global revenues of EUR 13.2 billion.
